EDUCATION

Carnegie Mellon University **Expected May 2027**

M.S. in Software Engineering | GPA: 4.0 / 4.0

Selected Coursework: Data Science for Software Engineering, Foundations of Software Engineering, Machine Learning

University of Wisconsin–Madison **May 2024**

B.S. in Computer Science & B.S. in Computer Engineering | GPA: 3.72 / 4.0

Selected Coursework: Software Engineering, Algorithms, Mobile Computing Laboratory

WORK EXPERIENCE

NewsBreak **May – August 2026**

Full-Stack Engineer Intern *Mountain View, CA*

- Shipped SportsBreak to the App Store as primary iOS engineer and sole backend author; the app reached ∼6,000 installs and 1,119 peak daily active users.
- Instrumented a 72-event Amplitude analytics catalog behind typed emit methods and a server-side allowlist, and built guest-first Firebase sign-in that upgrades anonymous sessions to Google, Apple, or email accounts.
- Ran an A/B test on DramaBreak menu options and read click-through rate in Amplitude; shipped a personalized LLM morning digest on SportsBreak that reached 5,026 users (∼81% of the base).
- Built server-driven UI over 27 widget types so a new feed surface ships without an App Store release, and cut the World feed from 25–30 client requests to one backend call; fixed its cache, which never hit because it was keyed per user, by sharing one copy as the pod neared its memory limit.
- Built the Python FastAPI and MongoDB backend from its first commit to 89 REST endpoints on AWS EKS, with ∼1,450 offline tests gating every merge in CI; set up Prometheus metrics and Grafana dashboards.
- Built a personalized LLM alert pipeline, ran it in shadow on production traffic for 11 days with a per-item decision log, and cut filler alerts from 34% to 4% before launch; root-caused a 65% failure rate in another team's LLM workers via Langfuse traces.

Haddee Education **June – September 2025**

Engineering Lead *San Diego, CA*

- Led an 8-intern team through Agile sprints to ship a React, Next.js, FastAPI, and Supabase web app from 0→1 on GCP App Engine; designed schemas and REST APIs for LangChain resume parsing and AI job matching.
- Broke down user stories, led PR reviews, and mentored interns on Git workflows, testing protocols, and scalable code practices.

ZenAI — MiraclePlus (Formerly YC China) F23 **September – December 2023**

Full Stack Developer *Beijing, China*

- Built a VC-backed startup's LLM mock-interview web app from 0→1 as the sole engineer in React, Next.js, Supabase, and PostgreSQL; owned authentication, session state, and database interactions.
- Iterated AI scoring and UI from user-testing sessions and fast client feedback, and demoed the product until three 200–500-person companies signed contracts.

SKILLS

Languages	TypeScript, JavaScript, Python, Swift, SQL, HTML, CSS, Go, Java
Full-Stack	React, Next.js, Tailwind CSS, FastAPI, REST APIs, Supabase, Firebase, Stripe, SwiftUI
Analytics & AI	Amplitude, Claude Code / AI coding tools, LLM tool calling / agents, MCP, RAG, LangChain
Data & Cloud	PostgreSQL, MongoDB, AWS, Kubernetes (EKS), Docker, GitHub Actions, CI/CD, Prometheus, Grafana
Certifications	AWS Certified Solutions Architect – Associate, AWS Certified Cloud Practitioner

PROJECTS & LEADERSHIP

- **codingplans:** Building a website that rates LLM coding/token plans; bought plans from Z.AI, MiniMax, and Kimi and tested KV caching, long context, and needle-in-a-haystack to show which providers nerfed caching or heavily quantized their models.
- **ECE Leadership & Engagement Fellow** (CMU, Aug 2026 – present): Own budgeting, marketing, and outreach for ECE student programs — company-sponsored hackathons, alumni events, and tech event outings.
