EDUCATION

Carnegie Mellon University **Expected May 2027**
M.S. in Software Engineering | GPA: 4.0 / 4.0
Selected Coursework: Foundations of Software Engineering, Software Refactoring, Distributed Systems

University of Wisconsin–Madison **May 2024**
B.S. in Computer Science & B.S. in Computer Engineering | GPA: 3.72 / 4.0
Selected Coursework: Software Engineering, Algorithms, Data Structure & Programming III, Operating Systems

WORK EXPERIENCE

NewsBreak **May – August 2026**
Full-Stack Engineer Intern *Mountain View, CA*

- Shipped SportsBreak to the App Store as the team's sole SwiftUI engineer and primary backend author; the app reached ∼6,000 installs and 1,119 peak daily active users, tracked through a 72-event Amplitude analytics catalog; built Firebase auth with Google, Apple, and email sign-in.
- Built the Python FastAPI and MongoDB backend from its first commit to 89 REST endpoints and 7 Kubernetes CronJobs on AWS EKS, with ∼1,450 offline tests gating every merge in CI (ruff, pyright, pytest).
- Built a coaching marketplace (profiles, reviews, booking; ∼5,500 lines) behind a feature flag and verified no deep link or notification could open it; A/B tested DramaBreak menu options by click-through rate in Amplitude.
- Shipped Stripe web checkout for DramaBreak with a signature-verified webhook and idempotent fulfillment, and server-driven UI over 27 widget types so a new catalog surface ships without an App Store release.
- Built a personalized breaking-news alert pipeline (embeddings, LLM scoring, LLM duplicate check); ran it in shadow mode on production traffic for 11 days to cut filler alerts from 34% to 4%, and shipped an LLM morning digest to 5,026 users (∼81% of the base).
- Root-caused Live Activity pushes that had never worked (iOS drops a start push with no alert while APNs returns 200) and a 5-day silent CronJob outage; wrote 34 contract-first API specs and ∼10,000 lines of engineering docs, and onboarded the second engineer.

Haddee Education **June – September 2025**
Engineering Lead *San Diego, CA*

- Led an 8-intern team through Agile sprints to take a React, Next.js, FastAPI, and Supabase web app from 0→1 on GCP App Engine; designed schemas and REST APIs for LangChain resume parsing, suggestions, and AI job matching.
- Broke down user stories, led PR reviews, and mentored interns on Git workflows, testing protocols, and scalable code practices.

ZenAI — MiraclePlus (Formerly YC China) F23 **September – December 2023**
Full Stack Developer *Beijing, China*

- Built a VC-backed startup's LLM mock-interview web app from 0→1 as the sole engineer in React, Next.js, Supabase, and PostgreSQL; owned authentication, session state, and database interactions.
- Iterated AI scoring and UI from user-testing sessions, worked with recruiters so scoring matched real hiring, and demoed the product until three 200–500-person companies signed contracts.

SKILLS

Languages	TypeScript, JavaScript, Python, SQL, HTML, CSS, Java, Go, Swift
Full-Stack	React, Next.js, Tailwind CSS, FastAPI, REST APIs, PostgreSQL, MySQL, MongoDB, Stripe
Testing & Data	pytest, Unit Testing, TDD, Amplitude, Git, Jira, Agile/Scrum
AI & LLM	LangChain, RAG, LLM tool calling / agents, Claude Code / AI coding tools
Cloud & Infra	AWS, GCP, Kubernetes (EKS), Docker, CI/CD, GitHub Actions, Prometheus, Grafana
Certifications	AWS Certified Solutions Architect – Associate, AWS Certified Cloud Practitioner

PROJECTS & LEADERSHIP

- **codingplans:** Building a site that rates LLM coding plans; bought Z.AI, MiniMax, and Kimi plans and tested KV caching, long context, and needle-in-a-haystack to expose nerfed caching and heavy quantization.
- **ECE Leadership & Engagement Fellow** (CMU, Aug 2026 – present): Own budgeting, marketing, and outreach for ECE student programs — company-sponsored hackathons, alumni events, and tech event outings.
