EDUCATION

Carnegie Mellon University **Expected May 2027**
M.S. in Software Engineering | GPA: 4.0 / 4.0
Selected Coursework: Distributed Systems, Software Refactoring, Data Science for Software Engineering

University of Wisconsin–Madison **May 2024**
B.S. in Computer Science & B.S. in Computer Engineering | GPA: 3.72 / 4.0
Selected Coursework: Operating Systems, Computer Architecture, Data Structure & Programming III

WORK EXPERIENCE

NewsBreak **May – August 2026**
Backend Engineer Intern *Mountain View, CA*

- Built the FastAPI / MongoDB backend as sole author from its first commit to 89 REST endpoints, 26 collections, and 7 Kubernetes CronJobs on AWS EKS, with ∼1,450 fully-offline tests gating every merge in CI.
- Designed an ingest → embed → LLM-score → dedupe → APNs data pipeline in one Kubernetes CronJob (∼2 min ingest to decision); ran it in shadow on 4,100+ production decisions before launch, cutting filler alerts 34% → 4% under a 2/day per-user cap that held with zero violations.
- Diagnosed a 5-day silent CronJob outage: an empty image tag left the Job in non-terminal ImagePullBackOff, so Forbid concurrency skipped every later run; fixed it with paired job and scheduler deadlines.
- Dug into another team's 1,661-commit LLM pipeline and root-caused its 65% run-failure rate via Langfuse traces to an unbounded reasoning loop and a Helm env shadowing the code default.
- Stood up the service on production EKS (Helm, Jenkins, two-stage Docker image) on day 3; diagnosed a DNS → TLS → admission-policy chain blocking iOS clients, and set up Prometheus / Grafana.
- Redesigned a cache that could not hit (13.2 MB keyed per user) into a 10.9 MB shared catalog, 78× smaller, as pod memory neared its 512 MiB limit; cut a 25–30 request client fan-out to one backend call.

Haddee Education **June – September 2025**
Engineering Lead *San Diego, CA*

- Led an 8-intern team through Agile sprints to ship a Next.js, FastAPI, and Supabase web app on GCP App Engine; designed database schemas and REST APIs for LangChain resume parsing and AI job matching.
- Broke user stories into engineering tasks, led PR reviews, and mentored interns on Git workflows and testing.

ZenAI — MiraclePlus (Formerly YC China) F23 **September – December 2023**
Full Stack Developer *Beijing, China*

- Built the LLM mock-interview web app from 0→1 as sole engineer in React, Next.js, and Supabase (PostgreSQL); owned auth, session state, and database interactions.
- Demoed and iterated on client requirements until three 200–500-person companies signed contracts.

RESEARCH EXPERIENCE

Control & Learning Group — Carnegie Mellon University **February – June 2026**
Graduate Researcher | Advisor: Prof. Yorie Nakahira

- Developed an Online Adaptive Probabilistic Safety Certificate (PSC) with PhD researchers; outperformed Adaptive MPC in 3-DOF vehicle simulations under environmental uncertainty.

SKILLS

Languages	Java, C, SQL, Python, Go, TypeScript, JavaScript, Bash
Cloud & Infra	AWS, GCP, Docker, Kubernetes (EKS), Helm, Terraform, Jenkins, GitHub Actions, Linux
Data & Backend	PostgreSQL, MySQL, MongoDB, Redis Streams, FastAPI, REST APIs, asyncio, Supabase
Testing & Tools	pytest, Unit Testing, Prometheus, Grafana, Langfuse, ruff, pyright, Git, Jira
Certifications	AWS Certified Solutions Architect – Associate, AWS Certified Cloud Practitioner

PROJECTS & LEADERSHIP

- **Operating Systems (C):** Implemented a pthread-based quicksort in C for UW–Madison coursework and contributed xv6 system-call entry points and a clone wrapper with pointer-argument validation.
- **Wisconsin Autonomous:** Integrated wheel-speed encoders with voltage-to-frequency converters and streamed real-time data to the onboard NVIDIA Jetson.
