EDUCATION

Carnegie Mellon University

Expected May 2027

M.S. in Software Engineering | GPA: 4.0 / 4.0

Selected Coursework: Foundations of Software Engineering, Software Refactoring, Distributed Systems

University of Wisconsin–Madison

May 2024

B.S. in Computer Science & B.S. in Computer Engineering | GPA: 3.72 / 4.0

Selected Coursework: Operating Systems, Computer Architecture, Data Structure & Programming III, Mobile Computing Laboratory

WORK EXPERIENCE

NewsBreak

May – August 2026

Software Engineering Intern

Mountain View, CA

- Sole SwiftUI engineer and primary backend author for [SportsBreak](#) (~6,000 installs, 1,119 peak daily active users); authored 344 pull requests across five repositories (340 merged).
- Found why Live Activity push-to-start had never worked: iOS silently drops a start push with no `aps.alert` while APNs still returns HTTP 200; fixed it by raising on the sender.
- Root-caused missing ad-mediation adapters to `NSClassFromString` instantiation letting the linker dead-strip static archives; proved the `-ObjC` fix with a +7.5 MB binary delta and $0 \rightarrow 2$ adapter symbols.
- Diagnosed a 5-day silent CronJob outage (non-terminal `ImagePullBackOff` + `Forbid` concurrency skipping every later scheduled run) and fixed it with paired job and scheduler deadlines.
- Root-caused a 65% failure rate in another team's LLM workers: one stalled read killed an `asyncio.gather` batch, an unbounded loop ran to 16,384 tokens, and a Helm env shadowed the code default.
- In a mature codebase (43 of 565 iOS commits), diagnosed a black screen after rewarded ads as AVPlayer resource contention, and a 3-line fix to an invalid `Package.resolved` unblocked builds for the team.
- Built a FastAPI / MongoDB backend from the first commit to 89 endpoints over 29 repositories, with ~1,450 fully-offline tests (0.17 s) behind a ruff / pyright / pytest gate.
- Wrote 34 contract-first API specs and ~10,000 lines of engineering docs, introduced the team's Jira backlog, and onboarded the second engineer.

Haddee Education

June – September 2025

Engineering Lead

San Diego, CA

- Led an 8-intern team through Agile sprints to ship a React, Next.js, FastAPI, and Supabase web app from 0→1 on GCP App Engine; designed its schemas and REST APIs, broke down user stories, led PR reviews, and mentored interns on Git workflows and testing.

ZenAI — MiraclePlus (Formerly YC China) 2023 Fall Batch

September – December 2023

Full Stack Developer

Beijing, China

- Sole engineer on a VC-backed startup's LLM mock-interview web app (React, Next.js, Supabase); iterated with clients on their requirements until three 200–500-person companies signed contracts.

Control & Learning Group — Carnegie Mellon University

February – June 2026

Graduate Researcher | Advisor: Prof. Yorie Nakahira

- Developed an Online Adaptive Probabilistic Safety Certificate (PSC) with PhD researchers; outperformed Adaptive MPC in 3-DOF vehicle simulations under environmental uncertainty, including ice.

SKILLS

Languages

C, Java, Python, Swift, Go, SQL, Bash

Systems & Debugging

Linux, asyncio, NVIDIA Jetson, Xcode, mitmproxy, Unit Testing, TDD, pytest, Git

Backend & Data

FastAPI, REST APIs, MongoDB, PostgreSQL, MySQL, Redis Streams

Cloud & Infra

AWS, GCP, Kubernetes (EKS), Docker, Helm, CronJobs, Jenkins, GitHub Actions

Certifications

AWS Certified Solutions Architect – Associate, AWS Certified Cloud Practitioner

PROJECTS & LEADERSHIP

- **Wisconsin Autonomous:** Integrated wheel-speed encoders with voltage-to-frequency converters on the competition rover and streamed real-time data to the onboard NVIDIA Jetson.
