

EDUCATION

Carnegie Mellon University <i>M.S. in Software Engineering</i> GPA: 4.0 / 4.0 Selected Coursework: Foundations of Software Engineering, Distributed Systems, Software Refactoring	Expected May 2027
University of Wisconsin–Madison <i>B.S. in Computer Science & B.S. in Computer Engineering</i> GPA: 3.72 / 4.0 Selected Coursework: Software Engineering, Data Structure & Programming III, Algorithms, Operating Systems	May 2024

WORK EXPERIENCE

NewsBreak <i>Software Engineering Intern</i>	May – August 2026 <i>Mountain View, CA</i>
- Built a FastAPI / MongoDB backend from the first commit to 89 endpoints with ~1,450 fully-offline tests (0.17s, 1:1 with production lines) behind a ruff / pyright / pytest CI gate; a Motor fake reproduces a production failure as a regression guard. - Wrote tests for an AI agent-written catalog cache, then found it could never hit (13.2 MB keyed per user) as pod memory neared its 512 MiB limit; re-keyed it to a shared 10.9 MB catalog (78× smaller) and cut the home-load copy 9.0 ms → 0.89 ms. - Replaced a 25–30 request client fan-out with one backend call under a 3-second per-source budget, and paged a 206-topic catalog so the first page fell from 2.8 MB (~4.7 s) to ~0.27 MB. - Designed a personalized news-alert pipeline that logs why every item fired or not, calibrated it in production shadow on 4,100+ decisions, and shipped it; an LLM same-story dedupe keeps users from two alerts for one event, and filler fell 34% → 4%. - Root-caused a 65% failure rate in another team’s LLM workers from Langfuse traces: one stalled read killed an <code>asyncio.gather</code> batch and an unbounded loop ran to 16,384 tokens; sized a 2,048-token cap. - Diagnosed a 5-day silent CronJob outage (non-terminal ImagePullBackOff + Forbid concurrency skipping every later run) and fixed it with paired job and scheduler deadlines. - Built hybrid search (substring + text index + vector, fused by RRF) where any failing leg degrades to the survivors; deterministic entity resolution took real queries from 0% to 100% P@1 at 0.4 ms per resolve. - Sole SwiftUI engineer and primary backend author for SportsBreak (~6,000 installs, 1,119 peak daily active users, a 72-event Amplitude analytics catalog); authored 344 pull requests across five repositories (340 merged).	
Haddee Education <i>Engineering Lead</i>	June – September 2025 <i>San Diego, CA</i>
Led an 8-intern team through Agile sprints to ship a React, Next.js, FastAPI, and Supabase web app from 0→1 on GCP App Engine; designed its database schemas and REST APIs, led PR reviews, and mentored interns on Git workflows and testing protocols.	
ZenAI — MiraclePlus (Formerly YC China) 2023 Fall Batch <i>Full Stack Developer</i>	September – December 2023 <i>Beijing, China</i>
Built a VC-backed startup’s LLM mock-interview web app from 0→1 as the sole engineer in React, Next.js, Supabase, and PostgreSQL; demoed it until three 200–500-person companies signed contracts.	

SKILLS

Languages	Python, Java, JavaScript, TypeScript, SQL, HTML, C, Go, Swift
Testing & AI Tools	Unit Testing, TDD, pytest, ruff, pyright, CI/CD, Git, Claude Code / AI coding tools
Data & Backend	PostgreSQL, MySQL, MongoDB, FastAPI, REST APIs, React, Next.js, asyncio
Cloud & Infra	AWS, GCP, Kubernetes (EKS), Docker, Helm, CronJobs, Jenkins, GitHub Actions
Certifications	AWS Certified Solutions Architect – Associate, AWS Certified Cloud Practitioner

PROJECTS & LEADERSHIP

- codingplans:** Benchmarking paid LLM coding plans (Z.AI, MiniMax, Kimi) with KV-cache, long-context, and needle-in-a-haystack tests to show which providers nerfed caching or heavily quantized their models.
- ECE Leadership & Engagement Fellow** (CMU, Aug 2026 – present): Own budgeting, marketing, and outreach for ECE student programs — company-sponsored hackathons, alumni events, and tech event outings.
