

EDUCATION

Carnegie Mellon University <i>M.S. in Software Engineering</i> GPA: 4.0 / 4.0 Selected Coursework: Distributed Systems, Foundations of Software Engineering, Machine Learning	Expected May 2027
University of Wisconsin–Madison <i>B.S. in Computer Science & B.S. in Computer Engineering</i> GPA: 3.72 / 4.0 Selected Coursework: Software Engineering, Data Structure & Programming III, Algorithms, Operating Systems	May 2024

WORK EXPERIENCE

NewsBreak <i>Software Engineering Intern</i>	May – August 2026 <i>Mountain View, CA</i>
- Built SportsBreak’s Python FastAPI / MongoDB backend from its first commit to 89 REST endpoints across 27 routers, with ~1,450 fully-offline tests (1:1 with production lines) behind a ruff / pyright / pytest CI gate. - Stood up production AWS EKS (Helm, Jenkins) on day 3 with 7 CronJobs; caught a stale ArgoCD app that would wipe Jenkins deploys and fixed a 5-day silent CronJob outage with paired deadlines. - Debugged a 65% failure rate in another team’s LLM pipeline (1,661-commit repo) via Langfuse traces: an unbounded reasoning loop plus a Helm env shadowing the code default; sized a token cap against p95 usage. - Contributed to DramaBreak’s mature two-repo codebase (20 PRs, 19 merged), shipping a Stripe web checkout with a signature-verified webhook as the only trusted fulfillment, idempotent with stale-pending reclaim. - Designed and shipped a personalized LLM alert pipeline as a Kubernetes CronJob; validated it in production shadow on 4,100+ logged decisions before going live, cutting filler 34% → 4%. - Wrote 34 contract-first API specs and ~10,000 lines of engineering docs; reopened two closed security tickets with line-level evidence the fixes were absent from the code. - Sole SwiftUI engineer for SportsBreak (~6,000 installs, peak DAU 1,119) and primary backend author; 344 PRs (340 merged); onboarded the team’s next engineer.	
Haddee Education <i>Engineering Lead</i>	June – September 2025 <i>San Diego, CA</i>
- Led an 8-intern team through Agile sprints to ship a React, Next.js, FastAPI, and Supabase web app from 0→1 on GCP App Engine; designed schemas and REST APIs for LangChain resume parsing and AI job matching. - Broke down user stories, led PR reviews, and mentored interns on Git workflows, testing protocols, and scalable code practices.	
ZenAI — MiraclePlus (Formerly YC China) 2023 Fall Batch <i>Full Stack Developer</i>	September – December 2023 <i>Beijing, China</i>
- Built a VC-backed startup’s LLM mock-interview web app from 0→1 as the sole engineer in React, Next.js, Supabase, and PostgreSQL; owned authentication, session state, and database interactions. - Demoed the product and iterated fast with clients until three 200–500-person companies signed contracts.	

SKILLS

Languages	Python, Java, JavaScript, TypeScript, C, Go, SQL, Swift, HTML, CSS
Web & APIs	React, Next.js, FastAPI, REST APIs, Stripe, PostgreSQL, MongoDB, Supabase
Cloud & Deploy	AWS, Kubernetes (EKS), Docker, Helm, Jenkins, GitHub Actions, CI/CD, GCP
Testing & Practices	pytest, Unit Testing, TDD, ruff, pyright, Git, Agile/Scrum, Jira
ML & AI	PyTorch, RAG, LLM tool calling / agents, LangChain, Langfuse
Certifications	AWS Certified Solutions Architect – Associate, AWS Certified Cloud Practitioner

PROJECTS & LEADERSHIP

- my-av:** Built a PyTorch CNN-GRU that predicts steering angle and speed from 1 s video; trained on 33 hours of Comma2k19 on local CUDA and GCP Vertex AI, with streaming inference.
- codingplans:** Building a site that rates LLM coding plans; bought Z.AI, MiniMax, and Kimi plans and tested KV caching, long context, and needle-in-a-haystack to expose nerfed caching and heavy quantization.
- ECE Leadership & Engagement Fellow** (CMU, Aug 2026 – present): Own budgeting, marketing, and outreach for ECE student programs — company-sponsored hackathons, alumni events, and tech event outings.
