

EDUCATION

Carnegie Mellon University <i>M.S. in Software Engineering</i> GPA: 4.0 / 4.0 Selected Coursework: Distributed Systems, Foundations of Software Engineering, Software Refactoring	Expected May 2027
University of Wisconsin–Madison <i>B.S. in Computer Science & B.S. in Computer Engineering</i> GPA: 3.72 / 4.0 Selected Coursework: Operating Systems, Computer Architecture, Algorithms	May 2024

WORK EXPERIENCE

NewsBreak <i>Engineering Intern</i>	May – August 2026 <i>Mountain View, CA</i>
• Stood up a production service on AWS EKS (Docker, Helm, Jenkins) on day 3; traced a DNS → TLS → admission-policy chain that blocked iOS clients on public networks and drove the public-domain fix. • Caught a stale ArgoCD app pinned to v0.1.0 with prune and self-heal on that would have wiped Jenkins deploys; built a two-stage amd64 image after a C extension crashed with SIGILL on arm64. • Diagnosed a 5-day silent CronJob outage (non-terminal ImagePullBackOff + Forbid concurrency skipping every later run) and fixed the mechanism with paired job and scheduler deadlines. • Root-caused a 65% failure rate in another team’s LLM workers via Langfuse traces: an unbounded reasoning loop (p95 1,197 tokens vs. 16,384 runaways) plus a Helm env shadowing the code default. • Set up Prometheus metrics and Grafana dashboards on EKS, and added a ruff / pyright / pytest GitHub Actions gate after two tests had sat red on main while Jenkins only built the image. • Redesigned a cache that could not hit (13.2MB keyed per user) after pod memory neared its 512MiB limit; re-keyed it to a shared 10.9MB catalog (78× smaller), sized under an HPA of 2–4 pods. • Built a FastAPI / MongoDB backend from the first commit to 89 endpoints and 7 CronJobs with ~1,450 fully-offline tests (0.17s); moved nine third-party integrations server-side so the client ships zero API keys. • Sole SwiftUI engineer and primary backend author for SportsBreak (~6,000 installs, 1,119 peak daily active users); 344 PRs across five repos (340 merged).	
Haddee Education <i>Engineering Lead</i>	June – September 2025 <i>San Diego, CA</i>
• Led an 8-intern team through Agile sprints to ship a React, Next.js, FastAPI, and Supabase web app from 0→1 on GCP App Engine; broke down user stories, led PR reviews, and mentored interns on Git and testing.	
ZenAI — MiraclePlus (Formerly YC China) 2023 Fall Batch <i>Full Stack Developer</i>	September – December 2023 <i>Beijing, China</i>
• Built a VC-backed startup’s LLM mock-interview web app from 0→1 as the sole engineer in React, Next.js, Supabase, and PostgreSQL; demoed it until three 200–500-person companies signed contracts.	

SKILLS

Languages	Python, Go, Java, C, Bash, SQL, TypeScript, Swift
Cloud & Infra	AWS, GCP, Kubernetes (EKS), Docker, Helm, Terraform, Linux, NGINX
CI/CD & Observability	Jenkins, GitHub Actions, ArgoCD, CI/CD, Prometheus, Grafana, Langfuse, kubectl
Backend & Testing	FastAPI, REST APIs, MongoDB, PostgreSQL, Redis Streams, pytest, ruff, Git
Certifications	AWS Certified Solutions Architect – Associate, AWS Certified Cloud Practitioner

PROJECTS & LEADERSHIP

- **Wisconsin Autonomous:** Integrated wheel-speed encoders with voltage-to-frequency converters on the competition rover and streamed real-time data to the onboard NVIDIA Jetson.
- **my-av:** Built a PyTorch CNN-GRU that predicts steering and speed from 20-frame (1s) video; trained on 33 hours of Comma2k19 on local CUDA and GCP Vertex AI and ran streaming inference.
- **codingplans:** Benchmarking paid LLM coding plans (Z.AI, MiniMax, Kimi) with KV-cache, long-context, and needle-in-a-haystack tests to show which providers nerfed caching or heavily quantized their models.
- **ECE Leadership & Engagement Fellow** (CMU, Aug 2026 – present): Own budgeting, marketing, and outreach for ECE student programs — company-sponsored hackathons, alumni events, and tech event outings.
