

EDUCATION

Carnegie Mellon University <i>M.S. in Software Engineering</i> GPA: 4.0 / 4.0 Selected Coursework: Distributed Systems, Machine Learning, Large Language Model Systems	Expected May 2027
University of Wisconsin–Madison <i>B.S. in Computer Science & B.S. in Computer Engineering</i> GPA: 3.72 / 4.0 Selected Coursework: Operating Systems, Computer Architecture, Algorithms	May 2024

WORK EXPERIENCE

NewsBreak <i>Backend Engineer Intern</i>	May – August 2026 <i>Mountain View, CA</i>
- Built a FastAPI / MongoDB backend from the first commit to 89 endpoints across 27 routers and 7 Kubernetes CronJobs, with ~1,450 fully-offline tests (0.17s) behind a ruff / pyright / pytest gate. - Wrote 34 contract-first API specs and moved nine third-party integrations (sports data, LLM, embeddings, APNs) server-side so the iOS client ships zero API keys. - Stood up the service on AWS EKS (Docker, Helm, Jenkins) on day 3; traced a DNS → TLS → admission-policy chain that blocked iOS clients on public networks and drove the public-domain fix. - Designed an ingest → embed → LLM-score → dedupe pipeline as a Kubernetes CronJob (~2min ingest-to-decision, ~1,200 LLM calls/day); calibrated it on 4,100+ shadow decisions, cutting filler 34% → 4%. - Root-caused a 65% failure rate in another team’s LLM workers via Langfuse traces: an unbounded reasoning loop (p95 1,197 tokens vs. 16,384 runaways) plus a Helm env shadowing the code default. - Set up Prometheus metrics and Grafana dashboards on EKS; diagnosed a 5-day silent CronJob outage (non-terminal ImagePullBackOff + Forbid concurrency) and fixed it with paired job and scheduler deadlines. - Redesigned a cache that could not hit (13.2MB keyed per user) after pod memory neared its 512MiB limit; re-keyed it to a shared 10.9MB catalog (78× smaller), sized under an HPA of 2–4 pods. - Sole SwiftUI engineer and primary backend author for SportsBreak (~6,000 installs, 1,119 peak daily active users); 344 PRs across five repos (340 merged).	
Haddee Education <i>Engineering Lead</i>	June – September 2025 <i>San Diego, CA</i>
Led an 8-intern team through Agile sprints to ship a React, Next.js, FastAPI, and Supabase web app from 0→1 on GCP App Engine; designed the database schemas and REST APIs and led PR reviews.	
ZenAI — MiraclePlus (Formerly YC China) 2023 Fall Batch <i>Full Stack Developer</i>	September – December 2023 <i>Beijing, China</i>
- Built a VC-backed startup’s LLM mock-interview web app from 0→1 as the sole engineer in React, Next.js, Supabase, and PostgreSQL; demoed it until three 200–500-person companies signed contracts. - Owned auth, session state, and database interactions; iterated AI scoring and UI from user-testing sessions.	

SKILLS

Languages	Python, C, Go, Java, SQL, Bash, TypeScript, Swift
Backend & Data	FastAPI, REST APIs, PostgreSQL, MySQL, MongoDB, Redis Streams, pytest
Cloud & Infra	AWS, GCP, Kubernetes (EKS), Docker, Helm, Terraform, Jenkins, Linux
ML & Observability	PyTorch, CUDA, OpenCV, GCP Vertex AI, Prometheus, Grafana, Langfuse
Certifications	AWS Certified Solutions Architect – Associate, AWS Certified Cloud Practitioner

PROJECTS & LEADERSHIP

- my-av:** Built a PyTorch CNN-GRU that predicts steering and speed from 20-frame (1s) video; built the data pipeline over 33 hours of Comma2k19 (shuffling, temporal windowing, 240×320 frames), trained on local CUDA and GCP Vertex AI, and ran streaming inference.
- codingplans:** Benchmarking paid LLM coding plans (Z.AI, MiniMax, Kimi) with KV-cache, long-context, and needle-in-a-haystack tests to show which providers nerfed caching or heavily quantized their models.
- ECE Leadership & Engagement Fellow** (CMU, Aug 2026 – present): Own budgeting, marketing, and outreach for ECE student programs — company-sponsored hackathons, alumni events, and tech event outings.
