EDUCATION

Carnegie Mellon University **Expected May 2027**
M.S. in Software Engineering | GPA: 4.0 / 4.0
Selected Coursework: Distributed Systems, Foundations of Software Engineering, Machine Learning

University of Wisconsin–Madison **May 2024**
B.S. in Computer Science & B.S. in Computer Engineering | GPA: 3.72 / 4.0
Selected Coursework: Operating Systems, Algorithms, Data Structure & Programming III

WORK EXPERIENCE

NewsBreak **May – August 2026**
Backend Engineer Intern *Mountain View, CA*

- Built the Python FastAPI and MongoDB backend from its first commit to 89 REST endpoints and 7 Kubernetes CronJobs on AWS EKS, with ∼1,450 offline tests gating every merge in CI (ruff, pyright, pytest).
- Stood up the service on production EKS (Helm, Jenkins, Docker) on day 3, then diagnosed a DNS → TLS → admission-policy chain that blocked iOS clients on public networks and drove a public-domain fix.
- Set up Prometheus metrics and Grafana dashboards for the backend, and fixed a 5-day silent CronJob outage (non-terminal ImagePullBackOff plus Forbid concurrency) with paired job and scheduler deadlines.
- Built a personalized LLM alert pipeline as a Kubernetes CronJob (ingest, embed, LLM-score, dedupe, push in ∼2 min); calibrated it in shadow on production traffic for 11 days, cutting filler alerts from 34% to 4%.
- Root-caused a 65% failure rate in another team's LLM workers via Langfuse traces and a Helm env shadowing the code default, and sized a token cap against observed successful runs.
- Shipped SportsBreak to the App Store as primary iOS engineer and sole backend author (∼6,000 installs), and moved nine third-party integrations server-side so the iOS binary ships zero API credentials.

Haddee Education **June – September 2025**
Engineering Lead *San Diego, CA*

- Led an 8-intern team through Agile sprints to ship a React, Next.js, FastAPI, and Supabase MVP on GCP App Engine; designed database schemas and REST APIs for LangChain resume parsing and AI job matching.
- Broke down user stories, led PR reviews, and mentored interns on Git workflows, testing protocols, and scalable code practices.

ZenAI — MiraclePlus (Formerly YC China) F23 **September – December 2023**
Full Stack Developer *Beijing, China*

- Built a VC-backed startup's LLM mock-interview web app from 0→1 as the sole engineer in React, Next.js, Supabase, and PostgreSQL; owned authentication, session state, and database interactions.
- Iterated AI scoring and UI from user testing, worked with recruiters so scoring matched real hiring, and demoed the product until three 200–500-person companies signed contracts.

SKILLS

Languages	Python, C, Java, JavaScript, TypeScript, Go, SQL, Bash
Cloud & Infra	AWS, Kubernetes (EKS), Docker, Helm, NGINX, Linux, Prometheus, Grafana, Langfuse
DevOps	Git, GitHub Actions, Jenkins, ArgoCD, CI/CD, pytest, Unit Testing, ruff, pyright
Backend & Data	FastAPI, REST APIs, asyncio, Redis Streams, MongoDB, PostgreSQL, MySQL
AI / LLM	LLM tool calling / agents, RAG, LangChain, PyTorch, Claude Code / AI coding tools
Certifications	AWS Certified Solutions Architect – Associate, AWS Certified Cloud Practitioner

PROJECTS & LEADERSHIP

- **OS coursework (C):** Implemented a pthread-based quicksort in C (UW–Madison) and contributed xv6 system-call entry points and a clone wrapper with pointer-argument validation.
- **my-av:** Developed a PyTorch CNN-GRU for real-time steering-angle and speed prediction from 20-frame (1s) video; built a data pipeline over 33 hours of Comma2k19 (shuffling, temporal windowing, 240×320 frames).
- **Wisconsin Autonomous:** Integrated wheel-speed encoders with voltage-to-frequency converters on the competition rover and streamed real-time data to the onboard NVIDIA Jetson.
- **ECE Leadership & Engagement Fellow** (CMU, Aug 2026 – present): Own budgeting, marketing, and outreach for ECE student programs — company-sponsored hackathons, alumni events, and tech event outings.
