EDUCATION

Carnegie Mellon University **Expected May 2027**
M.S. in Software Engineering | GPA: 4.0 / 4.0
Selected Coursework: Distributed Systems, Foundations of Software Engineering, Machine Learning

University of Wisconsin–Madison **May 2024**
B.S. in Computer Science & B.S. in Computer Engineering | GPA: 3.72 / 4.0
Selected Coursework: Operating Systems, Computer Architecture, Algorithms

WORK EXPERIENCE

NewsBreak **May – August 2026**
Software Engineering Intern *Mountain View, CA*

- Built the SportsBreak (1.4K App Store ratings) FastAPI / MongoDB backend from its first commit to 89 REST endpoints; moved nine third-party integrations server-side so the iOS binary ships zero API keys.
- Grew the suite from 25 to ∼1,450 fully-offline tests (0.17 s) behind a ruff / pyright / pytest CI gate; its MongoDB fake reproduces a production failure that silently killed a search leg behind HTTP 200.
- Stood up the service on AWS EKS (Helm, Jenkins) on day 3; diagnosed a DNS → TLS → admission-policy chain blocking iOS clients on public networks; set up Prometheus / Grafana.
- Diagnosed a 5-day silent CronJob outage: an empty image tag left the Job in non-terminal ImagePullBackOff, so Forbid concurrency skipped every later run; fixed with paired deadlines.
- Redesigned a cache that could not hit (13.2 MB keyed per user) into a 10.9 MB shared catalog, 78× smaller, after pod memory climbed toward its 512 MiB limit; cut a 25–30 request client fan-out to one backend call.
- Root-caused a 65% failure rate in another team's LLM workers via Langfuse traces to an unbounded reasoning loop and a Helm env shadowing the code default; sized a 2,048-token cap against p95 1,197 tokens.

Haddee Education **June – September 2025**
Engineering Lead *San Diego, CA*

- Led an 8-intern team through Agile sprints to ship a Next.js, FastAPI, and Supabase web app on GCP App Engine; designed database schemas and REST APIs for LangChain resume parsing and AI job matching.
- Broke down user stories, led PR reviews, and mentored interns on Git workflows, testing, and scalable code.

ZenAI — MiraclePlus (Formerly YC China) F23 **September – December 2023**
Full Stack Developer *Beijing, China*

- Built the LLM mock-interview web app from 0→1 as sole engineer in React, Next.js, and Supabase (PostgreSQL); owned auth, session state, and database interactions.
- Demoed the product to clients and iterated AI scoring with recruiters so its categories matched real-life hiring; three 200–500-person companies signed contracts.

RESEARCH EXPERIENCE

Control & Learning Group — Carnegie Mellon University **February – June 2026**
Graduate Researcher | Advisor: Prof. Yorie Nakahira

- Developed an Online Adaptive Probabilistic Safety Certificate (PSC) with PhD researchers; outperformed Adaptive MPC in 3-DOF vehicle simulations under environmental uncertainty.

SKILLS

Languages	Python, C, Java, Go, SQL, Bash, TypeScript, JavaScript
Testing & Systems	pytest, Unit Testing, TDD, ruff, pyright, mitmproxy, Linux, Git, CI/CD, GitHub Actions
Cloud & Data	AWS, GCP, Kubernetes (EKS), Docker, Helm, Prometheus, MongoDB, PostgreSQL
Web & ML	FastAPI, REST APIs, React, Next.js, PyTorch, CUDA, LangChain, RAG
Certifications	AWS Certified Solutions Architect – Associate, AWS Certified Cloud Practitioner

PROJECTS & LEADERSHIP

- **Operating Systems (C):** Implemented a pthread-based quicksort for UW–Madison coursework and contributed xv6 system-call entry points and a clone wrapper with pointer-argument validation.
- **Wisconsin Autonomous:** Integrated wheel-speed encoders with voltage-to-frequency converters and streamed real-time data to the onboard NVIDIA Jetson.
