EDUCATION

Carnegie Mellon University **Expected May 2027**

M.S. in Software Engineering | GPA: 4.0 / 4.0

Selected Coursework: Distributed Systems, Large Language Model Systems, Foundations of Software Engineering, Machine Learning

University of Wisconsin–Madison **May 2024**

B.S. in Computer Science & B.S. in Computer Engineering | GPA: 3.72 / 4.0

Selected Coursework: Algorithms, Software Engineering, Operating Systems, Large Language Models in Practice

WORK EXPERIENCE

NewsBreak **May – August 2026**

Software Engineering Intern *Mountain View, CA*

- Built the Python FastAPI and MongoDB backend from its first commit to 89 REST endpoints and 7 Kubernetes CronJobs on AWS EKS, with ∼1,450 offline tests gating every merge in CI (ruff, pyright, pytest).
- Built an LLM search API with fixed RAG retrieval on the first question and a capped tool-calling agent on follow-ups, streamed over SSE with server-resolved citations; new entity resolution got 20/20 logged queries right that used to return nothing.
- Built a breaking-news pipeline (embeddings, LLM scoring, LLM duplicate check) as a Kubernetes CronJob; ran it in shadow on production traffic for 11 days before launch, cutting filler alerts from 34% to 4%.
- Stood up production EKS with Helm, Jenkins, and a two-stage Docker image on day 3; set up Prometheus and Grafana, and fixed a 5-day silent CronJob outage (non-terminal ImagePullBackOff with Forbid concurrency) with paired job and scheduler deadlines.
- Migrated nine third-party integrations server-side so the iOS binary ships zero third-party API credentials, and replaced a 25–30 request client fan-out with one backend call.
- Shipped SportsBreak to the App Store as the team's sole SwiftUI engineer and primary backend author, including server-driven UI over 27 widget types; the app reached ∼6,000 installs and 1,119 peak DAU.

Haddee Education **June – September 2025**

Engineering Lead *San Diego, CA*

- Led an 8-intern team through Agile sprints to ship a React, Next.js, FastAPI, and Supabase MVP on GCP App Engine; designed database schemas and REST APIs for LangChain resume parsing and AI job matching.
- Broke down user stories, led PR reviews, and mentored interns on Git workflows, testing protocols, and scalable code practices.

ZenAI — MiraclePlus (Formerly YC China) F23 **September – December 2023**

Full Stack Developer *Beijing, China*

- Built a VC-backed startup's LLM mock-interview web app from 0→1 as the sole engineer in React, Next.js, Supabase, and PostgreSQL; owned authentication, session state, and database interactions.
- Iterated AI scoring and UI from user testing, worked with recruiters so scoring matched real hiring, and demoed the product until three 200–500-person companies signed contracts.

SKILLS

Languages	Python, Java, TypeScript, JavaScript, SQL, Go, C, Swift, HTML, CSS
Frameworks & Data	React, Next.js, FastAPI, REST APIs, MongoDB, PostgreSQL, MySQL, Supabase
Cloud & DevOps	Docker, Kubernetes (EKS), AWS, GCP, Helm, Jenkins, GitHub Actions, CI/CD, Linux
AI / LLM	RAG, LLM tool calling / agents, LangChain, MCP, Langfuse, PyTorch, Claude Code
Practices	pytest, Unit Testing, TDD, Git, Agile/Scrum, Jira, Prometheus, Grafana
Certifications	AWS Certified Solutions Architect – Associate, AWS Certified Cloud Practitioner

PROJECTS & LEADERSHIP

- **codingplans:** Building a site that rates LLM coding plans; bought Z.AI, MiniMax, and Kimi plans and tested KV caching, long context, and needle-in-a-haystack to expose nerfed caching and heavy quantization.
- **my-av:** Built a PyTorch CNN-GRU that predicts steering and speed from 1s video (33 hours of Comma2k19).
- **ECE Leadership & Engagement Fellow** (CMU, Aug 2026 – present): Own budgeting, marketing, and outreach for ECE student programs — company-sponsored hackathons, alumni events, and tech event outings.
