EDUCATION

Carnegie Mellon University **Expected May 2027**
M.S. in Software Engineering | GPA: 4.0 / 4.0
Selected Coursework: Distributed Systems, Foundations of Software Engineering, Software Refactoring

University of Wisconsin–Madison **May 2024**
B.S. in Computer Science & B.S. in Computer Engineering | GPA: 3.72 / 4.0
Selected Coursework: Operating Systems, Algorithms, Data Structure & Programming III

WORK EXPERIENCE

NewsBreak **May – August 2026**
Software Engineering Intern *Mountain View, CA*

- Built the FastAPI / MongoDB backend from its first commit to 89 endpoints over 26 collections and ∼48 indexes, with ∼1,450 fully-offline tests (0.17 s) behind a ruff / pyright / pytest gate; stood up production AWS EKS (Helm, Jenkins) on day 3 with 7 CronJobs.
- Wrote a MongoDB driver fake that reproduces the production cluster's pre-4.4 `$meta` failure, which had silently killed a search leg behind HTTP 200; the raise is now the regression guard.
- Built hybrid retrieval (substring + MongoDB `$text` + bge vectors, fused by RRF) where a failing leg degrades to the survivors; entity resolution took real logged queries from 0% to 100% P@1 at 0.4 ms.
- Measured a cache that could never hit (13.2 MB keyed per user), re-keyed it on content to a shared 10.9 MB (78× smaller) for a 512 MiB pod, and cut a home-load copy from 9.0 to 0.89 ms (15 vs 127 μs shallow vs deep).
- Diagnosed a 65% failure rate in another team's async LLM workers: a stalled Redis Streams read killed an `asyncio.gather` batch and Langfuse traces showed an unbounded reasoning loop; sized a 2,048-token cap against p95 1,197 tokens and modeled 49–66% failures vs 65% observed.
- Sole SwiftUI engineer on SportsBreak (1.4K App Store ratings); traced missing ad adapters to linker dead-stripping and proved the `-ObjC` fix with a +7.5 MB binary delta.

Haddee Education **June – September 2025**
Engineering Lead *San Diego, CA*

- Led an 8-intern team through Agile sprints to ship a Next.js, FastAPI, and Supabase app on GCP App Engine; designed database schemas and REST APIs for LangChain resume parsing and AI job matching.
- Broke down user stories, led PR reviews, and mentored interns on Git workflows, testing, and scalable code.

ZenAI — MiraclePlus (Formerly YC China) F23 **September – December 2023**
Full Stack Developer *Beijing, China*

- Built an LLM mock-interview app from 0→1 as sole engineer in React, Next.js, Supabase, and PostgreSQL; owned auth, session state, and database interactions; three 200–500-person companies signed contracts.

RESEARCH EXPERIENCE

Control & Learning Group — Carnegie Mellon University **February – June 2026**
Graduate Researcher | Advisor: Prof. Yorie Nakahira

- Developed an Online Adaptive Probabilistic Safety Certificate (PSC) with PhD researchers; outperformed Adaptive MPC in 3-DOF vehicle simulations under environmental uncertainty.

SKILLS

Languages	Java, C, Python, Go, SQL, TypeScript, Swift, Bash
Data & Systems	MongoDB, PostgreSQL, MySQL, Redis Streams, asyncio, hybrid retrieval, RRF, Linux, Git
Infra & Testing	Kubernetes (EKS), Docker, Helm, Prometheus, Grafana, GitHub Actions, pytest, AWS
Certifications	AWS Certified Solutions Architect – Associate, AWS Certified Cloud Practitioner

PROJECTS & LEADERSHIP

- **Operating Systems (C):** Implemented a pthread quicksort with mutexes and condition variables for UW–Madison coursework; contributed xv6 system-call entry points and a clone wrapper with pointer-argument validation.
- **ECE Leadership & Engagement Fellow** (CMU, Aug 2026 – present): Own budgeting, marketing, and outreach for ECE student programs — company-sponsored hackathons, alumni events, and tech event outings.
