EDUCATION

Carnegie Mellon University **Expected May 2027**
M.S. in Software Engineering | GPA: 4.0 / 4.0
Selected Coursework: Distributed Systems, Large Language Model Systems, Machine Learning

University of Wisconsin–Madison **May 2024**
B.S. in Computer Science & B.S. in Computer Engineering | GPA: 3.72 / 4.0
Selected Coursework: Algorithms, Data Structure & Programming III, Software Engineering, Large Language Models in Practice

WORK EXPERIENCE

NewsBreak **May – August 2026**
Full-Stack Engineer Intern *Mountain View, CA*

- Shipped SportsBreak to the App Store as sole SwiftUI engineer and primary backend author (∼6,000 installs, 1,119 peak DAU); wrote 34 contract-first API specs and onboarded a second engineer.
- Built the Python FastAPI and MongoDB backend from its first commit to 89 REST endpoints on AWS EKS (Docker, Helm, Jenkins), with ∼1,450 offline unit tests gating CI and Prometheus / Grafana monitoring.
- Built an LLM search API: fixed RAG retrieval on the first question, a capped tool-calling agent (5 tools, ≤3 hops) on follow-ups; entity resolution got 20/20 logged queries right that used to return nothing.
- Built a personalized news-alert pipeline (embeddings, LLM scoring, LLM dedupe); ran prompt ablations in shadow mode on 11 days of production traffic before launch, cutting filler alerts from 34% to 4%.
- Wrote tests for an AI-agent-written cache, then redesigned it when pod memory neared its 512 MiB limit: keyed per user, it never hit and held 13.2 MB per user, so re-keyed it on content to one shared 10.9 MB copy.
- Debugged production: a 5-day silent Kubernetes CronJob outage, fixed with paired job and scheduler deadlines, and a 65% failure rate in another team's LLM workers, traced via Langfuse to an unbounded reasoning loop.

Haddee Education **June – September 2025**
Engineering Lead *San Diego, CA*

- Led an 8-intern team through Agile sprints to ship a React, Next.js, FastAPI, and Supabase web app on GCP App Engine; designed schemas and REST APIs for LangChain resume parsing and AI job matching.
- Broke down user stories, led PR reviews, and mentored interns on Git workflows and testing.

ZenAI — MiraclePlus (Formerly YC China) F23 **September – December 2023**
Full Stack Developer *Beijing, China*

- Built a VC-backed startup's LLM mock-interview web app from 0→1 as the sole engineer in React, Next.js, Supabase, and PostgreSQL; owned authentication, session state, and database interactions.
- Demoed the product to clients and iterated fast on their feedback, working with recruiters so AI scoring matched real hiring, until three 200–500-person companies signed contracts.

RESEARCH EXPERIENCE

Control & Learning Group — Carnegie Mellon University **February – June 2026**
Graduate Researcher | Advisor: Prof. Yorie Nakahira

- Mapped natural-language instructions to formal safety specs with multi-turn LLMs and implemented Bayesian estimators for real-time road-friction adaptation (LuGre tire models).

SKILLS

Languages & AI	Python, JavaScript, TypeScript, Java, SQL, LLM tool calling / agents, RAG
Full-Stack	React, Next.js, FastAPI, REST APIs, PostgreSQL, MongoDB, Supabase, Git
Cloud & Tools	AWS, GCP, Kubernetes (EKS), Docker, CI/CD, Claude Code / AI coding tools
Certifications	AWS Certified Solutions Architect – Associate, AWS Certified Cloud Practitioner

PROJECTS & LEADERSHIP

- **my-av:** Built a CNN-GRU model that predicts steering angle and speed from 20-frame (1s) video; processed 33 hours of Comma2k19 footage and ran streaming inference on local CUDA and GCP Vertex AI.
- **ECE Leadership & Engagement Fellow** (CMU, Aug 2026 – present): Own budgeting, marketing, and outreach for ECE student programs — company-sponsored hackathons, alumni events, and tech event outings.
