

EDUCATION

Carnegie Mellon University

Expected May 2027

M.S. in Software Engineering | GPA: 4.0 / 4.0

Selected Coursework: Foundations of Software Engineering, Distributed Systems, Large Language Model Systems

University of Wisconsin–Madison

May 2024

B.S. in Computer Science & B.S. in Computer Engineering | GPA: 3.72 / 4.0

Selected Coursework: Algorithms, Data Structure & Programming III, Mobile Computing Laboratory

WORK EXPERIENCE

NewsBreak

May – August 2026

Software Engineering Intern

Mountain View, CA

- Sole SwiftUI engineer and primary backend author on [SportsBreak](#) (~6,000 installs, 1,119 peak daily active users, 1.4K App Store ratings); shipped Firebase auth and a 72-event analytics catalog; authored 344 PRs.
- Built the FastAPI / async MongoDB backend from its first commit to 89 REST endpoints and 26 collections, with ~1,450 fully offline tests (1:1 with production lines) behind a ruff / pyright / pytest CI gate.
- Built server-driven UI over 27 widget types so new catalog surfaces ship without an App Store release; unknown widget kinds drop instead of failing a page.
- Replaced a 25–30 request client fan-out with one backend call; redesigned a cache that could not hit (13.2 MB keyed per user) into a shared 10.9 MB catalog cache, 78× smaller and sized for a 512 MiB pod.
- Stood up production Kubernetes (AWS EKS, Helm, Jenkins) on day 3 with 7 CronJobs; fixed a 5-day silent CronJob outage (ImagePullBackOff + Forbid concurrency) with paired job and scheduler deadlines.
- Designed a personalized ingest → embed → LLM-score → dedupe → push pipeline; calibrated on 4,100+ shadow decisions, it cut filler alerts 34% → 4% and held its 2/day cap over 11,745 user-days.
- Designed an agentic search API: one SSE endpoint, deterministic RAG on turn 1 and a bounded tool-calling agent (≤3 hops, 5 tools) after; entity resolution took real logged queries from 0% to 100% P@1.
- Introduced the team’s Jira backlog unprompted, wrote 34 contract-first API specs and ~10,000 lines of engineering docs, and onboarded the second engineer.

Haddee Education

June – September 2025

Engineering Lead

San Diego, CA

- Led an 8-intern team through Agile sprints to ship a React, Next.js, FastAPI, and Supabase web app from 0→1 on GCP App Engine; designed the schemas and REST APIs for LangChain resume parsing.
- Broke down user stories, led PR reviews, and mentored interns on Git workflows, testing, and scalable code.

ZenAI — MiraclePlus (Formerly YC China) 2023 Fall Batch

September – December 2023

Full Stack Developer

Beijing, China

- Built a VC-backed startup’s LLM mock-interview web app from 0→1 as the sole engineer in React, Next.js, Supabase, and PostgreSQL; iterated AI scoring and UI from user-testing sessions.
- Demoed the product and iterated with clients until three 200–500-person companies signed contracts.

RESEARCH EXPERIENCE

Control & Learning Group — Carnegie Mellon University

February – June 2026

Graduate Researcher | Advisor: Prof. Yorie Nakahira

- Developed an Online Adaptive Probabilistic Safety Certificate (PSC) with PhD researchers; outperformed Adaptive MPC in 3-DOF vehicle simulations under environmental uncertainty.

SKILLS

Languages Python, Java, JavaScript, TypeScript, Go, Swift, SQL, C, HTML, CSS

Frameworks React, Next.js, FastAPI, SwiftUI, asyncio, Pydantic, Firebase, Supabase, LangChain

AI & Practices Claude Code / AI coding tools, LLM tool calling / agents, RAG, Unit Testing, pytest, Git

Data & Infra REST APIs, SSE, MongoDB, PostgreSQL, Docker, Kubernetes (EKS), Helm, AWS, GCP

PROJECTS

- **my-av:** Built a PyTorch CNN-GRU that predicts steering and speed from 1s video; trained on 33 hours of Comma2k19 on local CUDA and GCP Vertex AI.
