

EDUCATION

Carnegie Mellon University Expected May 2027

M.S. in Software Engineering | GPA: 4.0 / 4.0

Selected Coursework: Distributed Systems, Foundations of Software Engineering, Machine Learning

University of Wisconsin–Madison May 2024

B.S. in Computer Science & B.S. in Computer Engineering | GPA: 3.72 / 4.0

Selected Coursework: Software Engineering, Data Structure & Programming III, Algorithms, Operating Systems

WORK EXPERIENCE

NewsBreak May – August 2026

Software Engineering Intern Mountain View, CA

- Built SportsBreak’s Python FastAPI / MongoDB backend from its first commit to 89 REST endpoints across 27 routers, with ~1,450 fully-offline tests (1:1 with production lines) behind a ruff / pyright / pytest CI gate.
- Stood up production AWS EKS (Helm, Jenkins) on day 3 with 7 CronJobs; caught a stale ArgoCD app that would wipe Jenkins deploys and fixed a 5-day silent CronJob outage with paired deadlines.
- Wrote 34 contract-first API specs and ~10,000 lines of engineering docs; migrated nine third-party integrations server-side so the iOS binary ships zero third-party API credentials.
- Shipped a Stripe web-checkout path across backend and iOS, with a signature-verified webhook as the only trusted fulfillment, idempotent with a 60s stale-pending reclaim.
- Replaced a 25–30 request client fan-out with one backend call and a shared 10.9MB catalog cache — 78× smaller than a per-user key — sized for a 512 MiB pod.
- Designed and shipped a personalized LLM alert pipeline as a Kubernetes CronJob; validated it in production shadow on 4,100+ decisions before going live, cutting filler 34% → 4%.
- Sole SwiftUI engineer for SportsBreak (~6,000 installs, peak DAU 1,119) and primary backend author; 344 PRs (340 merged); onboarded the team’s next engineer.

Haddee Education June – September 2025

Engineering Lead San Diego, CA

- Led an 8-intern team through Agile sprints to ship a React, Next.js, FastAPI, and Supabase web app from 0→1 on GCP App Engine; designed schemas and REST APIs for LangChain resume parsing and AI job matching.
- Broke down user stories, led PR reviews, and mentored interns on Git workflows, testing protocols, and scalable code practices.

ZenAI — MiraclePlus (Formerly YC China) 2023 Fall Batch September – December 2023

Full Stack Developer Beijing, China

- Built a VC-backed startup’s LLM mock-interview web app from 0→1 as the sole engineer in React, Next.js, Supabase, and PostgreSQL; owned authentication, session state, and database interactions.
- Demoed the product and iterated fast with clients until three 200–500-person companies signed contracts.

SKILLS

Languages	Python, Java, JavaScript, TypeScript, C, Go, SQL, Swift, HTML, CSS
Web & APIs	React, Next.js, FastAPI, REST APIs, Stripe, PostgreSQL, MongoDB, Supabase
Cloud & Deploy	AWS, Kubernetes (EKS), Docker, Helm, Jenkins, GitHub Actions, CI/CD, GCP
Testing & Practices	pytest, Unit Testing, TDD, ruff, pyright, Git, Agile/Scrum, Jira
ML & AI	PyTorch, RAG, LLM tool calling / agents, LangChain, Langfuse
Certifications	AWS Certified Solutions Architect – Associate, AWS Certified Cloud Practitioner

PROJECTS & LEADERSHIP

- **my-av:** Built a PyTorch CNN-GRU that predicts steering angle and speed from 1s video; trained on 33 hours of Comma2k19 on local CUDA and GCP Vertex AI, with streaming inference.
- **codingplans:** Building a site that rates LLM coding plans; bought Z.AI, MiniMax, and Kimi plans and tested KV caching, long context, and needle-in-a-haystack to expose nerfed caching and heavy quantization.
- **ECE Leadership & Engagement Fellow** (CMU, Aug 2026 – present): Own budgeting, marketing, and outreach for ECE student programs — company-sponsored hackathons, alumni events, and tech event outings.
