

EDUCATION

Carnegie Mellon University <i>M.S. in Software Engineering GPA: 4.0 / 4.0</i> Selected Coursework: Distributed Systems, Machine Learning, Data Science for Software Engineering, Foundations of Software Engineering	Expected May 2027
University of Wisconsin–Madison <i>B.S. in Computer Science & B.S. in Computer Engineering GPA: 3.72 / 4.0</i> Selected Coursework: Algorithms, Operating Systems, Software Engineering, Large Language Models in Practice	May 2024

WORK EXPERIENCE

NewsBreak <i>Software Engineering Intern</i>	May – August 2026 <i>Mountain View, CA</i>
- Built SportsBreak’s Python FastAPI / MongoDB backend from its first commit to 89 REST endpoints on Kubernetes (EKS), with ~1,450 fully-offline tests behind a ruff / pyright / pytest CI gate. - Designed a personalized LLM news-alert pipeline, calibrated it in production shadow on 4,100+ decision rows, and shipped it live; filler fell 34% → 4%, with zero cap violations over 11,745 user-days. - Shipped a Stripe web-checkout path with a signature-verified, idempotent webhook as the only trusted fulfillment; migrated nine third-party integrations server-side so the app ships zero third-party API keys. - Replaced a 25–30 request client fan-out with one backend call and redesigned a per-user cache that could never hit into a shared 10.9 MB catalog cache, 78× smaller. - Traced another team’s 65% LLM failure rate via Langfuse to an unbounded reasoning loop and sized a token cap against p95 output; diagnosed a 5-day silent Kubernetes CronJob outage and fixed it with paired deadlines. - Sole SwiftUI engineer for SportsBreak (~6,000 installs, peak DAU 1,119) and primary backend author; 344 PRs (340 merged); started the team’s Jira backlog, reopened two closed security tickets with evidence, and onboarded the next engineer.	
Haddee Education <i>Engineering Lead</i>	June – September 2025 <i>San Diego, CA</i>
Led an 8-intern team through Agile sprints to ship a React, Next.js, FastAPI, and Supabase web app from 0→1 on GCP App Engine; designed database schemas and REST APIs for its LangChain LLM features.	
ZenAI — MiraclePlus (Formerly YC China) 2023 Fall Batch <i>Full Stack Developer</i>	September – December 2023 <i>Beijing, China</i>
Built a VC-backed startup’s LLM mock-interview web app from 0→1 as the sole engineer in React, Next.js, Supabase, and PostgreSQL; demoed it and iterated with clients until three 200–500-person companies signed contracts.	

RESEARCH EXPERIENCE

Control & Learning Group — Carnegie Mellon University <i>Graduate Researcher Advisor: Prof. Yorie Nakahira</i>	February – June 2026
Developed an Online Adaptive Probabilistic Safety Certificate (PSC) with PhD researchers for stochastic systems under uncertainty, outperforming Adaptive MPC; implemented Bayesian estimators for real-time adaptation.	

SKILLS

Languages	Python, Java, SQL, TypeScript, JavaScript, Go, C, Swift
Data & ML	PostgreSQL, MySQL, MongoDB, NumPy, PyTorch, Bayesian estimation, RAG
Backend & Web	FastAPI, Pydantic, REST APIs, React, Next.js, Stripe, Redis Streams, pytest, Git
Cloud & DevOps	AWS, GCP, Docker, Kubernetes (EKS), Helm, Jenkins, GitHub Actions, CI/CD, Linux
Practices	Unit Testing, TDD, Agile/Scrum, Jira, Claude Code / AI coding tools
Certifications	AWS Certified Solutions Architect – Associate, AWS Certified Cloud Practitioner

PROJECTS & LEADERSHIP

- ECE Leadership & Engagement Fellow** (CMU, Aug 2026 – present): Own budgeting, marketing, and outreach for ECE student programs — company-sponsored hackathons, alumni events, and tech event outings.
