EDUCATION

Carnegie Mellon University

Expected May 2027

M.S. in Software Engineering | GPA: 4.0 / 4.0

Selected Coursework: Distributed Systems, Foundations of Software Engineering, Software Refactoring

University of Wisconsin–Madison

May 2024

B.S. in Computer Science & B.S. in Computer Engineering | GPA: 3.72 / 4.0

Selected Coursework: Software Engineering, Algorithms, Operating Systems

WORK EXPERIENCE

NewsBreak

May – August 2026

Full-Stack Engineer Intern

Mountain View, CA

- Sole SwiftUI engineer and primary backend author on [SportsBreak](#) (~6,000 installs, 1,119 peak daily active users, 1.4K App Store ratings); authored 344 pull requests across five repositories (340 merged).
- Built the FastAPI / MongoDB backend from its first commit to 89 REST endpoints and 26 collections, with ~1,450 fully offline tests (1:1 with production lines) behind a ruff / pyright / pytest CI gate.
- Defined 34 contract-first API specs and wrote ~10,000 lines of engineering docs; introduced the team's Jira backlog unprompted and onboarded the second engineer.
- Migrated nine third-party integrations (sports data, YouTube, LLM and embedding APIs, internal services, APNs) server-side so the iOS binary ships zero third-party API credentials.
- Replaced a 25–30 request client fan-out with one backend call; redesigned a cache that could not hit (13.2 MB keyed per user) into a shared 10.9 MB catalog cache, 78× smaller and sized for a 512 MiB pod.
- Stood up containerized services on AWS EKS (Docker, Helm, Jenkins) on day 3 with 7 CronJobs; fixed a 5-day silent CronJob outage (ImagePullBackOff + Forbid concurrency) with paired job and scheduler deadlines.
- Shipped Stripe web checkout for DramaBreak with a signature-verified webhook as the only trusted fulfillment path and idempotent processing that reclaims pending orders stale for 60 seconds.
- Designed a personalized ingest → embed → LLM-score → dedupe → push pipeline; calibrated on 4,100+ shadow decisions, it cut filler alerts 34% → 4% and held its 2/day cap over 11,745 user-days.

Haddee Education

June – September 2025

Engineering Lead

San Diego, CA

- Led an 8-intern team through Agile sprints to ship a React, Next.js, FastAPI, and Supabase web app from 0→1 on GCP App Engine; designed the database schemas and REST APIs for its LangChain features.
- Broke down user stories, led PR reviews, and mentored interns on Git workflows, testing, and scalable code.

ZenAI — MiraclePlus (Formerly YC China) 2023 Fall Batch

September – December 2023

Full Stack Developer

Beijing, China

- Built a VC-backed startup's LLM mock-interview web app from 0→1 as the sole engineer in React, Next.js, Supabase, and PostgreSQL; owned auth, session state, and database interactions.
- Demoed the product and iterated with clients until three 200–500-person companies signed contracts.

RESEARCH EXPERIENCE

Control & Learning Group — Carnegie Mellon University

February – June 2026

Graduate Researcher | Advisor: Prof. Yorie Nakahira

- Developed an Online Adaptive Probabilistic Safety Certificate (PSC) with PhD researchers; outperformed Adaptive MPC in 3-DOF vehicle simulations under environmental uncertainty.

SKILLS

Languages Java, JavaScript, TypeScript, Python, Go, SQL, Swift, HTML, CSS

Backend & Cloud REST APIs, MongoDB, PostgreSQL, AWS, Docker, Kubernetes (EKS), Helm, CI/CD

Frameworks React, Next.js, FastAPI, Express, Stripe, Unit Testing, pytest, Git, Jenkins

AI & Certs Claude Code / AI coding tools, AWS Certified Solutions Architect – Associate

PROJECTS

- **my-av**: Built a PyTorch CNN-GRU that predicts steering and speed from 1s video; trained on 33 hours of Comma2k19 on local CUDA and GCP Vertex AI.
