PROJECTS & LEADERSHIP

- **my-av:** Built a PyTorch CNN-GRU that predicts steering and speed from 20-frame (1s) video; trained on 33 hours of Comma2k19 on local CUDA and GCP Vertex AI and ran streaming inference.
- **codingplans:** Benchmarking paid LLM coding plans (Z.AI, MiniMax, Kimi) with KV-cache, long-context, and needle-in-a-haystack tests to show which providers nerfed caching or heavily quantized their models.
- **ECE Leadership & Engagement Fellow** (CMU, Aug 2026 – present): Own budgeting, marketing, and outreach for ECE student programs — company-sponsored hackathons, alumni events, and tech event outings.
- **Wisconsin Autonomous:** Integrated wheel-speed encoders with voltage-to-frequency converters and streamed real-time data to the onboard NVIDIA Jetson.
