

EDUCATION

Carnegie Mellon University <i>M.S. in Software Engineering GPA: 4.0 / 4.0</i> Selected Coursework: Large Language Model Systems, Distributed Systems, Foundations of Software Engineering	Expected May 2027
University of Wisconsin–Madison <i>B.S. in Computer Science & B.S. in Computer Engineering GPA: 3.72 / 4.0</i> Selected Coursework: Algorithms, Data Structure & Programming III, Large Language Models in Practice	May 2024

WORK EXPERIENCE

NewsBreak <i>Software Engineering Intern</i>	May – August 2026 <i>Mountain View, CA</i>
- Built the FastAPI / MongoDB backend with AI coding tools from its first commit to 89 endpoints across 27 routers, 26 collections (~48 indexes), and ~1,450 fully-offline tests (0.17 s; 1:1 with production lines) behind a ruff / pyright / pytest CI gate. - Shipped agentic LLM search: deterministic RAG over hybrid retrieval (keyword, full-text, bge embeddings, RRF), a bounded tool-use agent, SSE streaming, and server-resolved citations; entity resolution hit 100% P@1. - Designed and shipped a personalized LLM alert pipeline (embed → LLM-score → LLM same-story judge → push); calibrated it in production shadow on 4,100+ decisions, cutting filler 34% → 4%. - Replaced a 25–30 request client fan-out with one backend call and a shared 10.9 MB catalog cache, 78× smaller than a per-user key; stood up production AWS EKS (Helm, Jenkins) on day 3. - Diagnosed a 65% failure rate in another team’s LLM pipeline, via Langfuse traces, as an unbounded reasoning loop, and a 5-day silent CronJob outage fixed with paired job and scheduler deadlines. - Sole SwiftUI engineer for SportsBreak (~6,000 installs, peak DAU 1,119) and primary backend author; 344 PRs (340 merged); wrote 34 contract-first API specs and ~10,000 lines of docs, and onboarded the next engineer.	
Haddee Education <i>Engineering Lead</i>	June – September 2025 <i>San Diego, CA</i>
- Led an 8-intern team through Agile sprints to ship a React, Next.js, FastAPI, and Supabase web app from 0→1 on GCP App Engine; designed the schemas and REST APIs for its LangChain LLM features. - Broke down user stories, led PR reviews, and mentored interns on Git workflows, testing protocols, and scalable code practices.	
ZenAI — MiraclePlus (Formerly YC China) 2023 Fall Batch <i>Full Stack Developer</i>	September – December 2023 <i>Beijing, China</i>
- Built a VC-backed startup’s LLM mock-interview web app from 0→1 as the sole engineer in React, Next.js, Supabase, and PostgreSQL; owned authentication, session state, and database interactions. - Worked with recruiters so AI scoring matched real hiring; demoed the product, iterated fast on client feedback, and won contracts with three 200–500-person companies.	

SKILLS

Languages	Python, TypeScript, JavaScript, Java, Go, SQL, Swift, C, HTML, CSS
AI & LLMs	Claude Code / AI coding tools, LLM tool calling / agents, RAG, LangChain, PyTorch, Langfuse, MCP
Frameworks & Data	React, Next.js, Express, FastAPI, Tailwind CSS, PostgreSQL, MongoDB, Supabase
Cloud & DevOps	AWS, GCP, Docker, Kubernetes (EKS), Helm, Jenkins, GitHub Actions, CI/CD
Practices	Git, pytest, Unit Testing, REST APIs, Server-Sent Events (SSE), Agile/Scrum
Certifications	AWS Certified Solutions Architect – Associate, AWS Certified Cloud Practitioner

PROJECTS & LEADERSHIP

- codingplans:** Rating LLM coding plans bought from Z.AI, MiniMax, and Kimi; tested KV caching, long context, and needle-in-a-haystack to show which providers nerfed caching or heavily quantized models.
- my-av:** Built a PyTorch CNN-GRU that predicts steering angle and speed from 1 s video; trained on 33 hours of Comma2k19 on local CUDA and GCP Vertex AI, with streaming inference.
- ECE Leadership & Engagement Fellow** (CMU, Aug 2026 – present): Own budgeting, marketing, and outreach for ECE student programs — company-sponsored hackathons, alumni events, and tech event outings.
