

EDUCATION

Carnegie Mellon University <i>M.S. in Software Engineering</i> GPA: 4.0 / 4.0 Selected Coursework: Foundations of Software Engineering, Distributed Systems, Software Refactoring	Expected May 2027
University of Wisconsin–Madison <i>B.S. in Computer Science & B.S. in Computer Engineering</i> GPA: 3.72 / 4.0 Selected Coursework: Software Engineering, Algorithms, Operating Systems, Large Language Models in Practice	May 2024

WORK EXPERIENCE

NewsBreak <i>Full-Stack Engineer Intern</i>	May – August 2026 <i>Mountain View, CA</i>
- Built SportsBreak’s Python FastAPI / MongoDB backend from its first commit to 89 REST endpoints across 27 routers and 129 Pydantic models, with ~1,450 fully-offline tests (1:1 with production lines) behind a ruff / pyright / pytest CI gate. - Built server-driven UI over 27 widget types so a new catalog surface ships without an App Store release; unknown kinds drop instead of failing a page, and one backend call replaced a 25–30 request client fan-out. - Shipped agentic LLM search behind one SSE endpoint: hybrid retrieval where any failing leg degrades to the survivors, a bounded tool loop (≤ 3 hops), and server-resolved citations; entity resolution hit 100% P@1 on real queries. - Shipped a Stripe web-checkout path with a signature-verified, idempotent webhook as the only trusted fulfillment; migrated nine third-party integrations server-side so the app ships zero third-party API keys. - Diagnosed a 5-day silent Kubernetes CronJob outage and fixed it with paired job and scheduler deadlines; traced another team’s 65% LLM failure rate via Langfuse to an unbounded reasoning loop. - Sole SwiftUI engineer for SportsBreak (~6,000 installs, peak DAU 1,119) and primary backend author; 344 PRs (340 merged); started the team’s Jira backlog, wrote 34 contract-first API specs, and onboarded the next engineer.	
Haddee Education <i>Engineering Lead</i>	June – September 2025 <i>San Diego, CA</i>
- Led an 8-intern team through Agile sprints to ship a React, Next.js, FastAPI, and Supabase web app from 0→1 on GCP App Engine; designed database schemas and REST APIs for its LangChain LLM features. - Broke down user stories, led PR reviews, and mentored interns on Git workflows, testing protocols, and scalable code practices.	
ZenAI — MiraclePlus (Formerly YC China) 2023 Fall Batch <i>Full Stack Developer</i>	September – December 2023 <i>Beijing, China</i>
- Built a VC-backed startup’s LLM mock-interview web app from 0→1 as the sole engineer in React, Next.js, Supabase, and PostgreSQL; owned authentication, session state, and database interactions. - Worked with recruiters so AI scoring matched real hiring; demoed the product, iterated fast on client feedback, and won contracts with three 200–500-person companies.	

SKILLS

Languages	Python, TypeScript, JavaScript, SQL, HTML, CSS, Go, Java, Swift, C
Web & APIs	React, Next.js, FastAPI, Pydantic, Express, Tailwind CSS, REST APIs, Stripe
Data	PostgreSQL, MongoDB, MySQL, Supabase, Firebase, Redis Streams
Cloud & DevOps	AWS, GCP, Docker, Kubernetes (EKS), Helm, Jenkins, GitHub Actions, CI/CD
AI & Practices	LLM tool calling / agents, RAG, Claude Code / AI coding tools, pytest, Git, Agile/Scrum
Certifications	AWS Certified Solutions Architect – Associate, AWS Certified Cloud Practitioner

PROJECTS & LEADERSHIP

- codingplans:** Building a website that rates LLM coding plans bought from Z.AI, MiniMax, and Kimi; tested KV caching, long context, and needle-in-a-haystack to show which providers nerfed caching or quantized models.
- ECE Leadership & Engagement Fellow** (CMU, Aug 2026 – present): Own budgeting, marketing, and outreach for ECE student programs — company-sponsored hackathons, alumni events, and tech event outings.
