

EDUCATION

Carnegie Mellon University Expected May 2027

M.S. in Software Engineering | GPA: 4.0 / 4.0

Selected Coursework: Distributed Systems, Machine Learning, Data Science for Software Engineering, Foundations of Software Engineering

University of Wisconsin–Madison May 2024

B.S. in Computer Science & B.S. in Computer Engineering | GPA: 3.72 / 4.0

Selected Coursework: Software Engineering, Algorithms, Operating Systems, Large Language Models in Practice

WORK EXPERIENCE

NewsBreak May – August 2026

Software Engineering Intern Mountain View, CA

- Built SportsBreak’s Python FastAPI / MongoDB backend from its first commit to 89 REST endpoints across 27 routers and 26 collections, with ~1,450 fully-offline tests (1:1 with production lines) behind a ruff / pyright / pytest CI gate.
- Stood up production AWS EKS (Helm, Jenkins) on day 3 with 7 Kubernetes CronJobs and a two-stage amd64 image; later diagnosed a 5-day silent CronJob outage and fixed it with paired job and scheduler deadlines.
- Built server-driven UI over 27 widget types so a new catalog surface ships without an App Store release; replaced a 25–30 request client fan-out with one backend call and a shared 10.9 MB cache, 78× smaller than a per-user key.
- Shipped agentic LLM search: hybrid retrieval (keyword, full-text, bge embeddings, RRF), a bounded tool loop, SSE streaming, and server-resolved citations; entity resolution hit 100% P@1 on real logged queries.
- Designed and shipped a personalized LLM alert pipeline (embed → LLM-score → LLM same-story judge → push); calibrated it in production shadow on 4,100+ decisions, cutting filler 34% → 4%.
- Sole SwiftUI engineer for SportsBreak (~6,000 installs, peak DAU 1,119) and primary backend author; 344 PRs (340 merged); wrote 34 contract-first API specs and ~10,000 lines of docs, and onboarded the next engineer.

Haddee Education June – September 2025

Engineering Lead San Diego, CA

- Led an 8-intern team through Agile sprints to ship a React, Next.js, FastAPI, and Supabase web app from 0→1 on GCP App Engine; designed schemas and REST APIs for LangChain resume parsing and AI job matching.
- Broke down user stories, led PR reviews, and mentored interns on Git workflows, testing protocols, and scalable code practices.

ZenAI — MiraclePlus (Formerly YC China) 2023 Fall Batch September – December 2023

Full Stack Developer Beijing, China

- Built a VC-backed startup’s LLM mock-interview web app from 0→1 as the sole engineer in React, Next.js, Supabase, and PostgreSQL; owned authentication, session state, and database interactions.
- Worked with recruiters so AI scoring matched real hiring; demoed the product, iterated fast on client feedback, and won contracts with three 200–500-person companies.

SKILLS

Languages	Python, Java, Go, JavaScript, TypeScript, SQL, HTML, CSS, Swift, C
Full Stack & Data	React, Next.js, FastAPI, Express, Tailwind CSS, PostgreSQL, MySQL, MongoDB, Supabase
Cloud & DevOps	Kubernetes (EKS), Docker, Helm, AWS, GCP, Jenkins, GitHub Actions, CI/CD
ML & AI	PyTorch, CUDA, RAG, hybrid retrieval, LLM tool calling / agents, LangChain, Langfuse
Practices	Git, pytest, Unit Testing, REST APIs, Server-Sent Events (SSE), Agile/Scrum
Certifications	AWS Certified Solutions Architect – Associate, AWS Certified Cloud Practitioner

PROJECTS & LEADERSHIP

- my-av: Built a PyTorch CNN-GRU that predicts steering angle and speed from 1 s video; trained on 33 hours of Comma2k19 on local CUDA and GCP Vertex AI, with streaming inference.
- ECE Leadership & Engagement Fellow (CMU, Aug 2026 – present): Own budgeting, marketing, and outreach for ECE student programs — company-sponsored hackathons, alumni events, and tech event outings.
