EDUCATION

Carnegie Mellon University **Expected May 2027**
M.S. in Software Engineering | GPA: 4.0 / 4.0
Selected Coursework: Large Language Model Systems, Machine Learning, Data Science for Software Engineering

University of Wisconsin–Madison **May 2024**
B.S. in Computer Science & B.S. in Computer Engineering | GPA: 3.72 / 4.0
Selected Coursework: Large Language Models in Practice, Software Engineering, Algorithms

WORK EXPERIENCE

NewsBreak **May – August 2026**
AI Engineer Intern *Mountain View, CA*

- Shipped SportsBreak to the App Store as the team's primary iOS (SwiftUI) engineer and sole backend author; the app reached ∼6,000 installs and 1,119 peak daily active users.
- Built an LLM search API: fixed RAG on the first question, a capped tool-calling agent on follow-ups, and server-resolved citations; entity resolution got 20/20 logged queries right that used to return nothing.
- Built a personalized LLM breaking-news alert pipeline; hand-graded outputs, added a categorical gate, and ran 11 days of production shadow before launch, cutting filler alerts 34% → 4%.
- Built the FastAPI / MongoDB backend from its first commit to 89 REST endpoints and 7 Kubernetes CronJobs on AWS EKS, with ∼1,450 offline tests gating every merge in CI.
- Shipped a personalized LLM morning digest to 5,026 users (∼81% of the base), and built server-driven UI over 27 widget types so a new feed surface ships without an App Store release.
- Diagnosed a 65% failure rate in another team's LLM pipeline, via Langfuse traces, as an unbounded reasoning loop hitting a 16,384-token ceiling.

Haddee Education **June – September 2025**
Engineering Lead *San Diego, CA*

- Led an 8-intern team to ship a React, Next.js, FastAPI, and Supabase web app from 0→1 on GCP App Engine.
- Designed schemas and REST APIs for LangChain resume parsing, resume suggestions, and AI job matching.

ZenAI — MiraclePlus (Formerly YC China) F23 **September – December 2023**
Full Stack Developer *Beijing, China*

- Built a VC-backed startup's LLM mock-interview web app from 0→1 as sole engineer in React, Next.js, and Supabase (PostgreSQL); owned auth, session state, and database interactions.
- Iterated with clients and recruiters until three 200–500-person companies signed contracts.

RESEARCH EXPERIENCE

Control & Learning Group — Carnegie Mellon University **February – June 2026**
Graduate Researcher | Advisor: Prof. Yorie Nakahira

- Mapped natural-language instructions to formal safety specs with multi-turn LLMs and implemented Bayesian estimators for real-time road-friction adaptation (LuGre tire models).
- Developed an Online Adaptive Probabilistic Safety Certificate (PSC) with PhD researchers; outperformed Adaptive MPC in 3-DOF vehicle simulations under environmental uncertainty.

SKILLS

Languages	Python, TypeScript, JavaScript, SQL, Swift, Go, Java, HTML, CSS
Web & Backend	React, Next.js, FastAPI, REST APIs, PostgreSQL, MongoDB, Supabase, Firebase
AI & LLM	RAG, LLM tool calling / agents, LangChain, Langfuse, bge embeddings, PyTorch
Cloud & Tools	AWS, GCP, Docker, Kubernetes (EKS), Helm, GitHub Actions, pytest, Amplitude, Git
Certifications	AWS Certified Solutions Architect – Associate, AWS Certified Cloud Practitioner

PROJECTS & LEADERSHIP

- **codingplans:** Building a site that rates LLM coding plans; bought Z.AI, MiniMax, and Kimi plans and tested KV caching, long context, and needle-in-a-haystack to expose nerfed caching or quantized models.
- **ECE Leadership & Engagement Fellow** (CMU, Aug 2026 – present): Own budgeting, marketing, and outreach for ECE student programs, including company-sponsored hackathons and alumni events.
