

EDUCATION

Carnegie Mellon University <i>M.S. in Software Engineering GPA: 4.0 / 4.0</i> Selected Coursework: Data Science for Software Engineering, Machine Learning, Distributed Systems	Expected May 2027
University of Wisconsin–Madison <i>B.S. in Computer Science & B.S. in Computer Engineering GPA: 3.72 / 4.0</i> Selected Coursework: Large Language Models in Practice, Algorithms, Operating Systems	May 2024

WORK EXPERIENCE

NewsBreak <i>Software Engineering Intern</i>	May – August 2026 <i>Mountain View, CA</i>
- Sole SwiftUI engineer on SportsBreak (peak DAU 1,119; ~6,000 installs); instrumented the client with a 72-event Amplitude analytics catalog behind 74 typed emit methods and a server-side event allowlist. - Designed and shipped a personalized LLM data pipeline as a Kubernetes CronJob (ingest → embed → LLM-score → select → dedupe → push, ~1,200 LLM calls/day), gating each article against its topic’s rolling 7-day score percentile and logging a decision row per item. - Evaluated the pipeline on 4,100+ production shadow decisions and hand-graded alerts before going live; cut filler 34% → 4% by count and held the 2/day cap over 11,745 user-days with zero violations. - Shipped agentic LLM search with RAG over hybrid retrieval (full-text + bge-embedding vector search fused with RRF) and server-resolved citations; took real logged queries from 0% to 100% P@1. - Built the Python FastAPI / MongoDB backend from its first commit to 89 REST endpoints on AWS EKS (Docker, Helm), with ~1,450 offline tests behind a ruff / pyright / pytest gate. - Diagnosed a 65% failure rate in another team’s LLM pipeline via Langfuse traces (an unbounded reasoning loop hitting a 16,384-token ceiling), and a 5-day silent CronJob outage fixed with paired job and scheduler deadlines.	
Haddee Education <i>Engineering Lead</i>	June – September 2025 <i>San Diego, CA</i>
Led an 8-intern team to ship a React, Next.js, FastAPI, and Supabase web app on GCP App Engine; designed database schemas and REST APIs for LangChain LLM resume parsing, suggestions, and AI job matching.	
ZenAI — MiraclePlus (Formerly YC China) 2023 Fall Batch <i>Full Stack Developer</i>	September – December 2023 <i>Beijing, China</i>
- Built a VC-backed startup’s LLM mock-interview web app from 0→1 as the sole engineer (React, Next.js, Supabase, PostgreSQL); owned authentication, session state, and database interactions. - Worked with recruiters so AI scoring categories matched real hiring and iterated scoring and UI from user-testing sessions; demoed the product and obtained contracts with mid-sized companies.	

RESEARCH EXPERIENCE

Control & Learning Group — Carnegie Mellon University <i>Graduate Researcher Advisor: Prof. Yorie Nakahira</i>	February – June 2026
Mapped natural-language instructions to formal safety specs with multi-turn LLMs; built an adaptive probabilistic safety certificate with PhD researchers that outperformed Adaptive MPC in simulation.	

SKILLS

Languages	Python, SQL, Java, Go, TypeScript, JavaScript, Swift, C
Data & ML	PyTorch, NumPy, RAG, bge embeddings, LangChain, MongoDB, PostgreSQL, MySQL
Ops & Cloud	Langfuse, Amplitude, Grafana, Kubernetes (EKS), Docker, Helm, AWS, GCP, CI/CD
APIs & Practices	FastAPI, REST APIs, Pydantic, pytest, Unit Testing, Git, Agile/Scrum, Jira
Certifications	AWS Certified Solutions Architect – Associate, AWS Certified Cloud Practitioner

PROJECTS & LEADERSHIP

- my-av:** Built a PyTorch CNN-GRU that predicts steering angle and speed from 20-frame (1s) video; built a data pipeline over 33 hours of Comma2k19 and ran streaming inference on local CUDA and GCP Vertex AI.
- ECE Leadership & Engagement Fellow** (CMU, Aug 2026 – present): Own budgeting, marketing, and outreach for ECE student programs — company-sponsored hackathons, alumni events, and tech event outings.
