

EDUCATION

Carnegie Mellon University <i>M.S. in Software Engineering GPA: 4.0 / 4.0</i> Selected Coursework: Data Science for Software Engineering, Large Language Model Systems	Expected May 2027
University of Wisconsin–Madison <i>B.S. in Computer Science & B.S. in Computer Engineering GPA: 3.72 / 4.0</i> Selected Coursework: Software Engineering, Large Language Models in Practice, Algorithms	May 2024

WORK EXPERIENCE

NewsBreak <i>Full-Stack Engineer Intern</i>	May – August 2026 <i>Mountain View, CA</i>
- Primary engineer on a small team’s app: sole SwiftUI engineer on SportsBreak (~6,000 installs, peak DAU 1,119) and author of 83% of backend commits; authored 344 pull requests across five repositories (340 merged). - Built the Python FastAPI / MongoDB backend from its first commit to 89 REST endpoints on AWS EKS (Docker, Helm, Jenkins), with ~1,450 offline tests behind a ruff / pyright / pytest CI gate. - Migrated nine third-party integrations (sports data, YouTube, SerpApi, LLM and embedding APIs, push) server-side so the iOS binary ships zero third-party API credentials. - Shipped LLM features end to end: agentic search with hybrid retrieval and server-resolved citations, and a news-alert pipeline (embed → LLM-score → LLM dedupe → push) that cut filler 34% → 4%. - Supported live systems: diagnosed a 5-day silent CronJob outage and fixed it with paired job and scheduler deadlines; traced a 65% failure rate in another team’s LLM pipeline to an unbounded reasoning loop.	
Haddee Education <i>Engineering Lead</i>	June – September 2025 <i>San Diego, CA</i>
- Led an 8-intern team through Agile sprints to ship a React, Next.js, FastAPI, and Supabase web app on GCP App Engine; designed database schemas and REST APIs for LangChain resume parsing and AI job matching. - Managed project execution by breaking down user stories, leading PR reviews, and mentoring interns on Git workflows, testing protocols, and scalable code practices.	
ZenAI — MiraclePlus (Formerly YC China) 2023 Fall Batch <i>Full Stack Developer</i>	September – December 2023 <i>Beijing, China</i>
- Built a VC-backed startup’s LLM mock-interview web app from 0→1 as the sole engineer (React, Next.js, Supabase, PostgreSQL); owned authentication, session state, and database interactions. - Worked closely with recruiters and clients: matched AI scoring categories to real hiring, iterated scoring and UI from user-testing sessions, demoed the product, and obtained contracts with mid-sized companies.	

RESEARCH EXPERIENCE

Control & Learning Group — Carnegie Mellon University <i>Graduate Researcher Advisor: Prof. Yorie Nakahira</i>	February – June 2026
Mapped natural-language instructions to formal safety specs with multi-turn LLMs; built an adaptive probabilistic safety certificate with PhD researchers that outperformed Adaptive MPC in simulation.	

SKILLS

Languages	Python, JavaScript, TypeScript, SQL, Java, Go, Swift, HTML, CSS
Web & APIs	React, Next.js, FastAPI, REST APIs, Pydantic, Express, Tailwind CSS, Supabase, Firebase
Data & AI	PostgreSQL, MongoDB, MySQL, LangChain, RAG, hybrid retrieval, Langfuse, PyTorch
Cloud & DevOps	AWS, GCP, Kubernetes (EKS), Docker, Helm, Jenkins, GitHub Actions, CI/CD, Linux
Practices	Git, Agile/Scrum, Jira, pytest, Unit Testing, TDD
Certifications	AWS Certified Solutions Architect – Associate, AWS Certified Cloud Practitioner

PROJECTS & LEADERSHIP

- my-av:** Built a PyTorch CNN-GRU that predicts steering angle and speed from 20-frame (1s) video; built a data pipeline over 33 hours of Comma2k19 and ran streaming inference on local CUDA and GCP Vertex AI.
- ECE Leadership & Engagement Fellow** (CMU, Aug 2026 – present): Own budgeting, marketing, and outreach for ECE student programs — company-sponsored hackathons, alumni events, and tech event outings.
