

EDUCATION

Carnegie Mellon University Expected May 2027

M.S. in Software Engineering | GPA: 4.0 / 4.0

Selected Coursework: Distributed Systems, Large Language Model Systems, Machine Learning

University of Wisconsin–Madison May 2024

B.S. in Computer Science & B.S. in Computer Engineering | GPA: 3.72 / 4.0

Selected Coursework: Algorithms, Data Structure & Programming III, Operating Systems, Software Engineering

WORK EXPERIENCE

NewsBreak May – August 2026

Software Engineering Intern Mountain View, CA

- Built SportsBreak’s production Python FastAPI / MongoDB backend from its first commit to 89 endpoints on AWS EKS, with ~1,450 offline tests behind a ruff / pyright / pytest CI gate; authored 344 PRs (340 merged).
- Sole SwiftUI engineer for SportsBreak (~6,000 installs, 1,119 peak daily active users); shipped Firebase auth, a 72-event Amplitude catalog, and an LLM morning digest viewed by 5,026 users (~81% of the base).
- Shipped LLM agentic search over hybrid retrieval (substring, full-text, and vector legs fused with RRF), a bounded tool loop (≤3 hops, 45 s), SSE streaming, and server-resolved citations; entity resolution took real logged queries that returned nothing from 0% to 100% P@1.
- Shipped a personalized LLM news-alert pipeline as a Kubernetes CronJob (ingest → embed → LLM-score → dedupe → push); calibrated it on 4,100+ production shadow decisions and cut filler alerts 34% → 4%.
- Replaced a 25–30 request client fan-out with one backend call and a shared catalog cache 78× smaller than the per-user key, sized for a 512 MiB pod; had an AI coding agent write the cache and verified it with my own tests.
- Root-caused a 5-day silent Kubernetes CronJob outage (ImagePullBackOff + Forbid concurrency), fixed with paired deadlines; traced another team’s 65% LLM failure rate via Langfuse to an unbounded reasoning loop.

Haddee Education June – September 2025

Engineering Lead San Diego, CA

- Led an 8-intern team to take a React, Next.js, FastAPI, and Supabase web app from 0→1 on GCP App Engine; broke down user stories, led PR reviews, and mentored interns on Git and testing.
- Designed database schemas and REST APIs for LangChain LLM features: resume parsing, improvement suggestions, and AI job matching.

ZenAI — MiraclePlus (Formerly YC China) 2023 Fall Batch September – December 2023

Full Stack Developer Beijing, China

- Built a VC-backed startup’s LLM mock-interview web app from 0→1 as the sole engineer in React, Next.js, Supabase, and PostgreSQL; owned authentication, session state, and database interactions.
- Iterated AI scoring and UI from user-testing sessions and fast client feedback, with recruiters shaping scoring to match real hiring; demoed the product and won contracts with mid-sized companies.

SKILLS

Languages	TypeScript, JavaScript, Python, SQL, Go, Java, Swift, C, HTML, CSS
Frameworks & Data	React, Next.js, Express, FastAPI, PostgreSQL, MongoDB, Supabase, Firebase, SwiftUI
Systems & Cloud	Linux, Bash, Kubernetes (EKS), Docker, Helm, AWS, GCP, GitHub Actions, CI/CD
AI & LLMs	RAG, hybrid retrieval, RRF, bge embeddings, LangChain, Langfuse, PyTorch
Testing & Practices	Unit Testing, pytest, TDD, REST APIs, Git, Agile/Scrum, Jira
Certifications	AWS Certified Solutions Architect – Associate, AWS Certified Cloud Practitioner

PROJECTS & LEADERSHIP

- my-av:** Built a PyTorch CNN-GRU that predicts steering and speed from 20-frame (1s) video; built a data pipeline over 33 hours of Comma2k19 and ran streaming inference on local CUDA and GCP Vertex AI.
- ECE Leadership & Engagement Fellow** (CMU, Aug 2026 – present): Own budgeting, marketing, and outreach for ECE student programs — company-sponsored hackathons, alumni events, and tech event outings.
- Wisconsin Autonomous:** Integrated wheel-speed encoders on the competition rover and streamed real-time data to the onboard NVIDIA Jetson.
