

EDUCATION

Carnegie Mellon University <i>M.S. in Software Engineering GPA: 4.0 / 4.0</i> Selected Coursework: Distributed Systems, Machine Learning, Foundations of Software Engineering	Expected May 2027
University of Wisconsin–Madison <i>B.S. in Computer Science & B.S. in Computer Engineering GPA: 3.72 / 4.0</i> Selected Coursework: Algorithms, Data Structure & Programming III, Operating Systems	May 2024

WORK EXPERIENCE

NewsBreak <i>Software Engineering Intern</i>	May – August 2026 <i>Mountain View, CA</i>
- Built SportsBreak’s production Python FastAPI / MongoDB backend from its first commit to 89 endpoints on AWS EKS, with ~1,450 offline tests behind a ruff / pyright / pytest CI gate; authored 344 PRs (340 merged). - Built deterministic entity resolution that matches real logged search queries to a 206-entity sports catalog at 0.4 ms (0% → 100% P@1), then shipped LLM agentic search on top: hybrid retrieval fused with RRF, a bounded tool loop (≤3 hops), SSE streaming, and server-resolved citations. - Sole SwiftUI engineer for SportsBreak (~6,000 installs, 1,119 peak daily active users); shipped Firebase auth and a 72-event Amplitude analytics catalog behind 74 typed emit methods and a server-side event allowlist. - Replaced a 25–30 request client fan-out with one backend call and a shared catalog cache 78× smaller than the per-user key, sized for a 512 MiB pod; had an AI coding agent write the cache and verified it with my own tests. - Shipped a personalized LLM news-alert pipeline as a Kubernetes CronJob (ingest → embed → LLM-score → dedupe → push); calibrated it on 4,100+ production shadow decisions and cut filler alerts 34% → 4%. - Root-caused a 5-day silent Kubernetes CronJob outage (ImagePullBackOff + Forbid concurrency), fixed with paired deadlines; traced another team’s 65% LLM failure rate via Langfuse to an unbounded reasoning loop.	
Haddee Education <i>Engineering Lead</i>	June – September 2025 <i>San Diego, CA</i>
- Led an 8-intern team to take a React, Next.js, FastAPI, and Supabase web app from 0→1 on GCP App Engine; broke down user stories, led PR reviews, and mentored interns on Git and testing. - Designed database schemas and REST APIs for LangChain LLM features: resume parsing, improvement suggestions, and AI job matching.	
ZenAI — MiraclePlus (Formerly YC China) 2023 Fall Batch <i>Full Stack Developer</i>	September – December 2023 <i>Beijing, China</i>
- Built a VC-backed startup’s LLM mock-interview web app from 0→1 as the sole engineer in React, Next.js, Supabase, and PostgreSQL; owned authentication, session state, and database interactions. - Worked with recruiters so scoring categories matched real hiring, and iterated AI scoring and UI from user-testing sessions; demoed the product and won contracts with mid-sized companies.	

SKILLS

Languages	Python, Go, TypeScript, Swift, JavaScript, SQL, Java, C, HTML, CSS
Frameworks & Data	React, Next.js, FastAPI, Pydantic, SwiftUI, PostgreSQL, MongoDB, Firebase, Supabase
Cloud & Platform	AWS, Docker, Kubernetes (EKS), Helm, GCP, GitHub Actions, CI/CD, Linux, Bash
ML & LLMs	PyTorch, LangChain, CUDA, RAG, hybrid retrieval, RRF, bge embeddings, Langfuse
Testing & Practices	Unit Testing, pytest, TDD, REST APIs, Git, Agile/Scrum, Jira
Certifications	AWS Certified Solutions Architect – Associate, AWS Certified Cloud Practitioner

PROJECTS & LEADERSHIP

- my-av:** Built a PyTorch CNN-GRU that predicts steering and speed from 20-frame (1s) video; built a data pipeline over 33 hours of Comma2k19 and ran streaming inference on local CUDA and GCP Vertex AI.
- ECE Leadership & Engagement Fellow** (CMU, Aug 2026 – present): Own budgeting, marketing, and outreach for ECE student programs — company-sponsored hackathons, alumni events, and tech event outings.
- Wisconsin Autonomous:** Integrated wheel-speed encoders on the competition rover and streamed real-time data to the onboard NVIDIA Jetson.
