

EDUCATION

Carnegie Mellon University <i>M.S. in Software Engineering</i> GPA: 4.0 / 4.0 Selected Coursework: Distributed Systems, Foundations of Software Engineering, Machine Learning	Expected May 2027
University of Wisconsin–Madison <i>B.S. in Computer Science & B.S. in Computer Engineering</i> GPA: 3.72 / 4.0 Selected Coursework: Algorithms, Mobile Computing Laboratory, Software Engineering, Operating Systems	May 2024

WORK EXPERIENCE

NewsBreak <i>Software Engineering Intern</i>	May – August 2026 <i>Mountain View, CA</i>
- Primary author of SportsBreak’s Python FastAPI / MongoDB backend, from its first commit to 89 endpoints on AWS EKS with ~1,450 offline tests behind a ruff / pyright / pytest gate; authored 344 PRs (340 merged). - Sole SwiftUI engineer for SportsBreak (~6,000 installs, 1,119 peak daily active users); got it onto the App Store through three trademark rejections by cutting the hero World Cup feature, and shipped guest-first Firebase auth and a 72-event Amplitude analytics catalog. - Built a live segment-broadcast push tool used during the World Cup; notifications beat other sports apps and arrived a minute before FOX broadcast the goal; also shipped ActivityKit Live Activities for live scores. - Built server-driven UI over 27 widget types so new catalog surfaces ship without an App Store release, and shipped a personalized LLM morning digest that reached 5,026 users (~81% of the user base). - Replaced a 25–30 request client fan-out with one backend call and a shared catalog cache 78× smaller than the per-user key, sized for a 512 MiB pod. - Migrated nine third-party integrations server-side so the iOS binary ships zero third-party API credentials; rolled back a keyless ESPN proxy after 2.5 hours since it only added latency and a health dependency. - Root-caused a 5-day silent CronJob outage and fixed it with paired deadlines; on sister app DramaBreak, shipped Stripe web checkout with signature-verified, idempotent webhook fulfillment.	
Haddee Education <i>Engineering Lead</i>	June – September 2025 <i>San Diego, CA</i>
- Led an 8-intern team through Agile sprints to take a React, Next.js, FastAPI, and Supabase web app from 0→1 on GCP App Engine; broke down user stories, led PR reviews, and mentored interns on Git and testing. - Designed database schemas and REST APIs for LangChain LLM features: resume parsing, improvement suggestions, and AI job matching.	
ZenAI — MiraclePlus (Formerly YC China) 2023 Fall Batch <i>Full Stack Developer</i>	September – December 2023 <i>Beijing, China</i>
- Built a VC-backed startup’s LLM mock-interview web app from 0→1 as the sole engineer in React, Next.js, Supabase, and PostgreSQL; owned authentication, session state, and database interactions. - Ran fast iterations with clients and recruiters on AI scoring and UI from user-testing sessions; demoed the product and won contracts with mid-sized companies.	

SKILLS

Languages	Python, TypeScript, Swift, Go, JavaScript, SQL, Java, C, HTML, CSS
Frameworks & Data	FastAPI, React, Next.js, SwiftUI, MongoDB, PostgreSQL, Firebase, Supabase
Cloud & Platform	AWS, Kubernetes (EKS), Docker, Helm, GCP, GitHub Actions, CI/CD, Linux, Bash
ML & LLMs	PyTorch, LangChain, RAG, hybrid retrieval, bge embeddings, Langfuse
Testing & Practices	REST APIs, Unit Testing, pytest, TDD, Git, Agile/Scrum, Jira
Certifications	AWS Certified Solutions Architect – Associate, AWS Certified Cloud Practitioner

PROJECTS & LEADERSHIP

- my-av:** Built a PyTorch CNN-GRU that predicts steering and speed from 1s video; trained on 33 hours of Comma2k19 on local CUDA and GCP Vertex AI.
- ECE Leadership & Engagement Fellow** (CMU, Aug 2026 – present): Own budgeting, marketing, and outreach for ECE student programs — company-sponsored hackathons, alumni events, and tech event outings.
