EDUCATION

Carnegie Mellon University **Expected May 2027**
M.S. in Software Engineering | GPA: 4.0 / 4.0
Selected Coursework: Distributed Systems, Foundations of Software Engineering, Software Refactoring

University of Wisconsin–Madison **May 2024**
B.S. in Computer Science & B.S. in Computer Engineering | GPA: 3.72 / 4.0
Selected Coursework: Algorithms, Data Structure & Programming III, Software Engineering, Operating Systems

WORK EXPERIENCE

NewsBreak **May – August 2026**
Software Engineering Intern *Mountain View, CA*

- Built the Python FastAPI and MongoDB backend from its first commit to 89 REST endpoints and 7 Kubernetes CronJobs on AWS EKS, with ∼1,450 offline tests gating every merge in CI (ruff, pyright, pytest); stood up production EKS with Helm and Jenkins on day 3.
- Wrote 34 contract-first API specs and ∼10,000 lines of engineering docs, introduced the team's Jira backlog, and onboarded the second engineer; reviewed and wrote tests for AI-agent-written cache code.
- Built a breaking-news data pipeline (ingest, embeddings, LLM scoring, dedupe, push) as a Kubernetes CronJob; ran it in shadow mode on production traffic for 11 days, cutting filler alerts from 34% to 4%.
- Migrated nine third-party integrations server-side so the iOS binary ships zero third-party API credentials, replaced a 25–30 request client fan-out with one backend call, and shipped Stripe web checkout with a signature-verified webhook and idempotent fulfillment.
- Set up Prometheus metrics and Grafana dashboards on EKS; diagnosed a 5-day silent CronJob outage (non-terminal ImagePullBackOff with Forbid concurrency) and fixed it with paired job and scheduler deadlines, and traced a 65% failure rate in another team's LLM pipeline to an unbounded reasoning loop via Langfuse.
- Shipped SportsBreak to the App Store as the team's sole SwiftUI engineer and primary backend author; the app reached ∼6,000 installs and 1,119 peak daily active users.

Haddee Education **June – September 2025**
Engineering Lead *San Diego, CA*

- Led an 8-intern team through Agile sprints to ship a React, Next.js, FastAPI, and Supabase MVP on GCP App Engine; designed schemas and REST APIs for LangChain resume parsing and AI job matching.
- Broke down user stories, led PR reviews, and mentored interns on Git workflows and testing protocols.

ZenAI — MiraclePlus (Formerly YC China) F23 **September – December 2023**
Full Stack Developer *Beijing, China*

- Built a VC-backed startup's LLM mock-interview web app from 0→1 as the sole engineer in React, Next.js, Supabase, and PostgreSQL; owned authentication, session state, and database interactions.
- Iterated AI scoring and UI from user testing, worked with recruiters so scoring matched real hiring, and demoed the product until three 200–500-person companies signed contracts.

SKILLS

Languages	Java, Python, SQL, TypeScript, JavaScript, Go, C, Swift
Backend & Data	REST APIs, FastAPI, PostgreSQL, MySQL, MongoDB, Redis Streams, React, Next.js
Cloud & DevOps	AWS, Kubernetes (EKS), Docker, Helm, Jenkins, GitHub Actions, CI/CD, Terraform, Linux
Testing & Ops	Prometheus, Grafana, Langfuse, pytest, Unit Testing, TDD, Git, Jira, Agile/Scrum
AI Tools	Claude Code / AI coding tools, LangChain, RAG, LLM tool calling / agents
Certifications	AWS Certified Solutions Architect – Associate, AWS Certified Cloud Practitioner

PROJECTS & LEADERSHIP

- **codingplans:** Building a site that rates LLM coding plans; bought Z.AI, MiniMax, and Kimi plans and tested KV caching, long context, and needle-in-a-haystack to expose nerfed caching and heavy quantization.
- **Operating Systems (UW–Madison):** Implemented a pthread-based quicksort in C and contributed xv6 system-call entry points and a clone wrapper with pointer-argument validation.
- **ECE Leadership & Engagement Fellow** (CMU, Aug 2026 – present): Own budgeting, marketing, and outreach for ECE student programs — company-sponsored hackathons, alumni events, and tech event outings.
