WORK EXPERIENCE

NewsBreak

May – August 2026

Software Engineering Intern

Mountain View, CA

- Opened a production FastAPI service with its first commit and grew it to 89 endpoints across 27 routers, ~62k lines, and ~1,450 fully-offline tests (0.17s) behind a ruff / pyright / pytest gate.
- Redesigned a cache that could not hit: 13.2 MB per user (structurally-zero hit rate) → 10.9 MB shared (78×), and caught an OOM against a 512 MiB pod before production.
- Designed a personalized LLM alert pipeline, hand-graded shadow alerts, and shipped it at 1.8 median sends/day (cap 2) after production shadow on 4,100+ decision rows; filler 34% → 4%.
- Primary author on both sides of the stack (69% of iOS commits, 83% of backend; 344 PRs across five repos, 340 merged) and sole full-time engineer while onboarding the next hire.

Haddee Education

June – September 2025

Engineering Lead

San Diego, CA

- Led an 8-intern team to take a Next.js, FastAPI, and Supabase product from 0→1 and ship it on GCP App Engine.
- Broke down user stories, led PR reviews, and mentored interns on Git workflows, testing protocols, and scalable code practices.

ZenAI — MiraclePlus (Formerly YC China) 2023 Fall Batch

September – December 2023

Full Stack Developer

Beijing, China

- Built a VC-backed startup's LLM mock-interview web app from 0→1 in React, Next.js, and Supabase.
- Owned auth, session state, and database interactions; iterated AI scoring and UI from user-testing sessions.

RESEARCH EXPERIENCE

Control & Learning Group — Carnegie Mellon University

February – June 2026

Graduate Researcher | Advisor: Prof. Yorie Nakahira

- Developed an Online Adaptive Probabilistic Safety Certificate (PSC) with PhD researchers; outperformed Adaptive MPC in 3-DOF vehicle simulations under environmental uncertainty.
- Mapped natural-language instructions to formal safety specs with multi-turn LLMs and implemented Bayesian estimators for real-time road-friction adaptation (LuGre tire models).
