EDUCATION

Carnegie Mellon University **Expected May 2027**
M.S. in Software Engineering | GPA: 4.0 / 4.0
Selected Coursework: Distributed Systems, Foundations of Software Engineering, Large Language Model Systems

University of Wisconsin–Madison **May 2024**
B.S. in Computer Science & B.S. in Computer Engineering | GPA: 3.72 / 4.0
Selected Coursework: Data Structure & Programming III, Algorithms, Operating Systems, Software Engineering

WORK EXPERIENCE

NewsBreak **May – August 2026**
Software Engineering Intern *Mountain View, CA*

- Built the Python FastAPI and MongoDB backend from its first commit to 89 REST endpoints and 7 Kubernetes CronJobs on AWS EKS, with ∼1,450 offline tests gating every merge in CI (ruff, pyright, pytest).
- Stood up production EKS (Helm, Jenkins, Docker) on day 3, set up Prometheus and Grafana, and fixed a 5-day silent CronJob outage with paired job and scheduler deadlines.
- Cut the World feed from 25–30 client requests to one backend call; caught that its AI-written cache never hit (keyed per user, 13.2 MB each) and shared one 10.9 MB copy as the pod neared its memory limit.
- Built a near-real-time news pipeline as a Kubernetes CronJob (ingest, embed, LLM-score, dedupe, push in ∼2 min); ran it in shadow on production traffic for 11 days, cutting filler alerts from 34% to 4%.
- Wrote 34 contract-first API specs and ∼10,000 lines of engineering docs, started the team's Jira backlog, and reopened two closed security tickets with line-level evidence that the fixes were absent.
- Shipped SportsBreak to the App Store as the sole SwiftUI engineer (∼6,000 installs; peak DAU 1,119), and moved nine third-party integrations server-side so the iOS binary ships zero API credentials.

Haddee Education **June – September 2025**
Engineering Lead *San Diego, CA*

- Led an 8-intern team through Agile sprints to ship a React, Next.js, FastAPI, and Supabase MVP on GCP App Engine; designed database schemas and REST APIs for LangChain resume parsing and AI job matching.
- Broke down user stories, led PR reviews, and mentored interns on Git workflows, testing protocols, and scalable code practices.

ZenAI — MiraclePlus (Formerly YC China) F23 **September – December 2023**
Full Stack Developer *Beijing, China*

- Built a VC-backed startup's LLM mock-interview web app from 0→1 as the sole engineer in React, Next.js, Supabase, and PostgreSQL; owned authentication, session state, and database interactions.
- Iterated AI scoring and UI from user testing, worked with recruiters so scoring matched real hiring, and demoed the product until three 200–500-person companies signed contracts.

SKILLS

Languages	Python, Java, Go, TypeScript, JavaScript, SQL, C, Swift
AI & Dev Tools	Claude Code / AI coding tools, Git, GitHub Actions, CI/CD, pytest, Unit Testing, Jira
Cloud & Data	AWS, Kubernetes (EKS), Docker, Jenkins, PostgreSQL, MySQL, MongoDB, Redis Streams
Backend & Ops	FastAPI, REST APIs, Server-Sent Events, Prometheus, Grafana, Linux, Bash, Terraform
AI / LLM	RAG, LLM tool calling / agents, LangChain, Langfuse, PyTorch
Certifications	AWS Certified Solutions Architect – Associate, AWS Certified Cloud Practitioner

PROJECTS & LEADERSHIP

- **my-av:** Developed a PyTorch CNN-GRU for real-time steering-angle and speed prediction from 20-frame (1s) video; built a data pipeline over 33 hours of Comma2k19 (shuffling, temporal windowing, 240×320 frames).
- **codingplans:** Building a site that rates LLM coding plans; bought Z.AI, MiniMax, and Kimi plans and tested KV caching, long context, and needle-in-a-haystack to expose nerfed caching and heavy quantization.
- **Wisconsin Autonomous:** Integrated wheel-speed encoders with voltage-to-frequency converters on the competition rover and streamed real-time data to the onboard NVIDIA Jetson.
- **ECE Leadership & Engagement Fellow** (CMU, Aug 2026 – present): Own budgeting, marketing, and outreach for ECE student programs — company-sponsored hackathons, alumni events, and tech event outings.
