EDUCATION

Carnegie Mellon University **Expected May 2027**
M.S. in Software Engineering | GPA: 4.0 / 4.0
Selected Coursework: Distributed Systems, Software Refactoring, Machine Learning, LLM Systems

University of Wisconsin–Madison **May 2024**
B.S. in Computer Science & B.S. in Computer Engineering | GPA: 3.72 / 4.0
Selected Coursework: Algorithms, Operating Systems, Software Engineering, Computer Architecture

WORK EXPERIENCE

NewsBreak **May – August 2026**
Software Engineering Intern *Mountain View, CA*

- Shipped SportsBreak to the App Store as the team's sole SwiftUI engineer and primary backend author; the app reached ∼6,000 installs and 1,119 peak daily active users.
- Built the FastAPI and MongoDB backend from its first commit to 89 REST endpoints and 7 Kubernetes CronJobs on AWS EKS, with ∼1,450 offline tests gating every merge in CI (ruff, pyright, pytest).
- Cut the World feed from 25–30 client requests to one backend call, and fixed a cache that never hit because it was keyed per user (13.2 MB each) by sharing one 10.9 MB copy as the pod neared its memory limit.
- Built a personalized breaking-news alert pipeline (embeddings, LLM scoring, LLM duplicate check); ran it in shadow mode on production traffic for 11 days before launch, cutting filler alerts from 34% to 4%.
- Built an LLM search API with fixed RAG retrieval on the first question and a capped tool-calling agent on follow-ups; new entity resolution got 20/20 logged queries right that used to return nothing.

Haddee Education **June – September 2025**
Engineering Lead *San Diego, CA*

- Led an 8-intern team through Agile sprints to ship a React, Next.js, FastAPI, and Supabase web app from 0→1 on GCP App Engine; led PR reviews and mentored interns on Git workflows and testing.
- Designed the schemas and REST APIs for LangChain resume parsing, resume suggestions, and job matching.

ZenAI — MiraclePlus (Formerly YC China) F23 **September – December 2023**
Full Stack Developer *Beijing, China*

- Built a VC-backed startup's LLM mock-interview web app from 0→1 as the sole engineer in React, Next.js, Supabase, and PostgreSQL; owned auth, session state, and database interactions.
- Demoed the product and iterated with clients until three 200–500-person companies signed contracts.

RESEARCH EXPERIENCE

Control & Learning Group — Carnegie Mellon University **February – June 2026**
Graduate Researcher | Advisor: Prof. Yorie Nakahira

- Developed an Online Adaptive Probabilistic Safety Certificate (PSC) with PhD researchers; outperformed Adaptive MPC in 3-DOF vehicle simulations under environmental uncertainty.
- Mapped natural-language instructions to formal safety specs with multi-turn LLMs and implemented Bayesian estimators for real-time road-friction adaptation (LuGre tire models).

SKILLS

Languages	Python, TypeScript, JavaScript, Java, Go, Swift, SQL, C, Bash
Frameworks	FastAPI, Pydantic, React, Next.js, SwiftUI, Express, LangChain, Firebase, Supabase
Data & AI	MongoDB, PostgreSQL, MySQL, Redis Streams, PyTorch, RAG, LLM agents, Langfuse
Cloud & DevOps	AWS, GCP, Kubernetes (EKS), Docker, Helm, Jenkins, GitHub Actions, Prometheus
Practices	REST APIs, pytest, Unit Testing, CI/CD, Agile/Scrum, Git, Jira
Certifications	AWS Certified Solutions Architect – Associate, AWS Certified Cloud Practitioner

PROJECTS & LEADERSHIP

- **my-av:** Built a PyTorch CNN-GRU that predicts steering angle and speed from 20-frame (1s) video; processed 33 hours of Comma2k19 and trained on local CUDA and GCP Vertex AI.
- **ECE Leadership & Engagement Fellow** (CMU, Aug 2026 – present): Own budgeting, marketing, and outreach for ECE student programs — company-sponsored hackathons, alumni events, and tech event outings.
