WORK EXPERIENCE

NewsBreak <i>Software Engineering Intern</i>	May – August 2026 <i>Mountain View, CA</i>
- Built SportsBreak’s production FastAPI/MongoDB backend from scratch to 89 endpoints, with ~1,450 fully offline tests and CI checks for linting, types, and tests; wrote 34 contract-first API specifications. - Consolidated 25–30 client requests into one backend call and replaced a per-user cache with a shared 10.9 MB catalog cache, identifying an OOM risk in a 512 MiB pod before production. - Shipped Stripe web checkout for DramaBreak with signature-verified webhooks as the sole trusted fulfillment path and idempotent fulfillment with stale-pending recovery. - Built and shipped a personalized LLM alert pipeline; hand-grading revealed similar scores for filler and confirmed events, prompting a classification gate that cut filler from 34% to 4% by count.	
Haddee Education <i>Engineering Lead</i>	June – September 2025 <i>San Diego, CA</i>
- Led an 8-intern team to build and ship a resume-parsing and job-matching web app using Next.js, FastAPI, and Supabase on GCP App Engine. - Broke down user stories, led PR reviews, and mentored interns on Git workflows, testing protocols, and scalable code practices.	
ZenAI — MiraclePlus (Formerly YC China) 2023 Fall Batch <i>Full Stack Developer</i>	September – December 2023 <i>Beijing, China</i>
- Built a VC-backed startup’s LLM mock-interview web app from scratch in React, Next.js, and Supabase; owned authentication, session state, and database interactions. - Refined scoring categories with recruiters and iterated from user feedback; demoed the product and obtained contracts with mid-sized companies.
