EDUCATION

Carnegie Mellon University **Expected May 2027**
M.S. in Software Engineering | GPA: 4.0 / 4.0
Selected Coursework: Distributed Systems, Foundations of Software Engineering, Software Refactoring

University of Wisconsin–Madison **May 2024**
B.S. in Computer Science & B.S. in Computer Engineering | GPA: 3.72 / 4.0
Selected Coursework: Operating Systems, Computer Architecture, Data Structure & Programming III

WORK EXPERIENCE

NewsBreak **May – August 2026**
Software Engineering Intern *Mountain View, CA*

- Shipped SportsBreak to the App Store as sole backend author and primary iOS engineer; built the Python FastAPI / MongoDB service from its first commit to 89 REST endpoints and 7 Kubernetes CronJobs.
- Grew the test suite from 25 to ∼1,450 fully offline tests gating every merge in CI (ruff, pyright, pytest), including a hand-written database fake that reproduces a production cluster failure as a regression guard.
- Stood up the containerized service on production EKS (Docker, Helm, Jenkins) on day 3, then debugged a DNS → TLS → admission-policy chain that blocked iOS clients on public networks and drove a public-domain fix.
- Migrated nine third-party integrations server-side so the app ships zero third-party API credentials; traced a 65% failure rate in another team's LLM pipeline, via Langfuse traces, to an unbounded reasoning loop.
- Fixed a 5-day silent CronJob outage (stuck ImagePullBackOff + Forbid concurrency) with job and scheduler deadlines; found iOS drops Live Activity start pushes with no `aps.alert` while APNs returns 200.
- Root-caused dead-stripped ad mediation adapters to `NSClassFromString` and proved the `-ObjC` linker fix with a +7.5 MB binary delta and 0 → 2 adapter symbols; expanded `app-ads.txt` from 62 to 1,332 records, recovering three days of silently discarded bids.

Haddee Education **June – September 2025**
Engineering Lead *San Diego, CA*

- Led an 8-intern team through Agile sprints to take a React, Next.js, FastAPI, and Supabase web app from 0→1 and ship it on GCP App Engine; led PR reviews and mentored interns on Git workflows and testing protocols.
- Designed and reviewed the database schemas and REST API structure for LangChain LLM features: resume parsing, improvement suggestions, and AI job matching.

ZenAI — MiraclePlus (Formerly YC China) F23 **September – December 2023**
Full Stack Developer *Beijing, China*

- Sole engineer on a VC-backed startup's LLM mock-interview web app (React, Next.js, Supabase, PostgreSQL); owned auth and the database and iterated with clients until three 200–500-person companies signed.

Control & Learning Group — Carnegie Mellon University **February – June 2026**
Graduate Researcher

- Developed an Online Adaptive Probabilistic Safety Certificate (PSC) with PhD researchers; outperformed Adaptive MPC in 3-DOF vehicle simulations under environmental uncertainty, including ice.

PROJECTS

- **Operating Systems (UW–Madison):** Wrote a pthread-based quicksort in C with mutexes and condition-variable completion signaling; contributed xv6 system-call entry points and a `clone` wrapper.
- **Wisconsin Autonomous:** Integrated wheel-speed encoders with voltage-to-frequency converters on the competition rover and streamed real-time data to the onboard NVIDIA Jetson.
- **my-av:** Built a PyTorch CNN-GRU that predicts steering and speed from 1 s video; trained on 33 hours of Comma2k19 on local CUDA and GCP Vertex AI.

SKILLS

Languages	C, Python, Go, Java, Swift, SQL, Bash, TypeScript
Systems & Networking	Linux, REST APIs, NVIDIA Jetson, Docker, Kubernetes (EKS), Helm, NGINX, Git
Testing & CI	pytest, Unit Testing, TDD, ruff, pyright, GitHub Actions, Jenkins, CI/CD
Backend & Cloud	FastAPI, Pydantic, MongoDB, PostgreSQL, AWS, GCP, Prometheus, Grafana
Certifications	AWS Certified Solutions Architect – Associate, AWS Certified Cloud Practitioner
