EDUCATION

Carnegie Mellon University

Expected May 2027

M.S. in Software Engineering | GPA: 4.0 / 4.0

Selected Coursework: Large Language Model Systems, Distributed Systems, Foundations of Software Engineering

University of Wisconsin–Madison

May 2024

B.S. in Computer Science & B.S. in Computer Engineering | GPA: 3.72 / 4.0

Selected Coursework: Mobile Computing Laboratory, Large Language Models in Practice, Software Engineering

WORK EXPERIENCE

NewsBreak

May – August 2026

Full-Stack Engineer Intern

Mountain View, CA

- Sole SwiftUI engineer and primary backend author for SportsBreak (~6,000 installs, 1,119 peak DAU); grew the FastAPI / MongoDB backend from its first commit to 89 endpoints with ~1,450 tests.
- Shipped the iOS app through three App Store rejections; built Firebase auth, Live Activities, and server-driven UI over 27 widget types so new surfaces ship without an App Store release.
- Shipped a personalized LLM alert pipeline that scores each article into a categorical label plus 0–100 importance, then dedupes with an LLM judge; calibrated on 4,100+ shadow decisions, filler 34% → 4%.
- Built LLM agentic search over hybrid retrieval with SSE streaming and server-resolved citations, so the model cannot author a URL; entity resolution took real logged queries from 0% to 100% P@1.
- Stood up production EKS (Helm, Jenkins) on day 3; later fixed a 5-day silent CronJob outage (ImagePullBackOff + Forbid concurrency) with paired job and scheduler deadlines.
- Shipped a personalized LLM morning digest to 5,026 users (~81% of the base) and migrated nine third-party integrations server-side so the iOS binary ships zero third-party API credentials.

Haddee Education

June – September 2025

Engineering Lead

San Diego, CA

- Led an 8-intern team to take a React, Next.js, FastAPI, and Supabase web app from 0→1 on GCP App Engine; broke down user stories, led PR reviews, and mentored interns on testing and Git.
- Designed database schemas and REST APIs for LangChain LLM features: resume parsing, improvement suggestions, and AI job matching.

ZenAI — MiraclePlus (Formerly YC China) 2023 Fall Batch

September – December 2023

Full Stack Developer

Beijing, China

- Built a VC-backed startup's LLM mock-interview web app from 0→1 as the sole engineer in React, Next.js, Supabase, and PostgreSQL; owned authentication, session state, and database interactions.
- Worked directly with recruiters and clients to iterate AI scoring and UI; demoed the product and won contracts with mid-sized companies.

RESEARCH EXPERIENCE

Control & Learning Group — Carnegie Mellon University

February – June 2026

Graduate Researcher | Advisor: Prof. Yorie Nakahira

- Mapped natural-language instructions to formal safety specs with multi-turn LLMs and implemented Bayesian estimators for real-time road-friction adaptation (LuGre tire models).

SKILLS

Languages	Python, TypeScript, JavaScript, Swift, SQL, HTML, CSS, Go, Java, C
Frameworks & Tools	React, Next.js, Express, SwiftUI, ActivityKit, FastAPI, Pydantic, Firebase, Supabase
Data & AI	LangChain, RAG, hybrid retrieval, Langfuse, PostgreSQL, MongoDB, MySQL, PyTorch
Cloud & DevOps	AWS, GCP, Kubernetes (EKS), Docker, Helm, Jenkins, GitHub Actions, CI/CD
Testing & Practices	pytest, Unit Testing, TDD, REST APIs, Agile/Scrum, Git, Jira
Certifications	AWS Certified Solutions Architect – Associate, AWS Certified Cloud Practitioner

PROJECTS

- **my-av:** Built a PyTorch CNN-GRU that predicts steering and speed from 20-frame (1s) video; processed 33 hours of Comma2k19 and ran streaming inference on local CUDA and GCP Vertex AI.
