

EDUCATION

Carnegie Mellon University <i>M.S. in Software Engineering</i> GPA: 4.0 / 4.0 Selected Coursework: Data Science for Software Engineering, Distributed Systems, Software Refactoring	Expected May 2027
University of Wisconsin–Madison <i>B.S. in Computer Science & B.S. in Computer Engineering</i> GPA: 3.72 / 4.0 Selected Coursework: Software Engineering, Algorithms, Large Language Models in Practice	May 2024

WORK EXPERIENCE

NewsBreak <i>Full-Stack Engineer Intern</i>	May – August 2026 <i>Mountain View, CA</i>
• Sole SwiftUI engineer and primary backend author for SportsBreak (~6,000 installs, 1,119 peak DAU); built the Python FastAPI / MongoDB REST backend from its first commit to 89 endpoints with ~1,450 fully-offline tests behind a ruff / pyright / pytest CI gate. • Built server-driven UI over 27 reusable widget types so a new surface ships without an App Store release and unknown kinds drop instead of failing a page; wrote 34 contract-first API specs. • Shipped a personalized LLM data pipeline (ingest → embed → LLM-score → dedupe → push) that surfaces model outputs to users; calibrated on 4,100+ production shadow decisions, cutting filler alerts 34% → 4%. • Built LLM agentic search with hybrid retrieval, SSE streaming, and server-resolved citations; entity resolution took real logged queries that returned nothing from 0% to 100% P@1. • Shipped a personalized LLM morning digest to 5,026 users (~81% of the base) and migrated nine third-party integrations server-side so the client ships zero third-party API credentials. • Helped debug another team’s LLM data pipeline: traced a 65% run-failure rate via Langfuse to an unbounded reasoning loop hitting a 16,384-token ceiling, and sized a 2048-token cap against p95 1,197. • Replaced a 25–30 request client fan-out with one backend call and a shared catalog cache 78× smaller than the per-user key; stood up production AWS EKS (Helm, Jenkins, Docker) on day 3.	
Haddee Education <i>Engineering Lead</i>	June – September 2025 <i>San Diego, CA</i>
• Led an 8-intern team through Agile sprints to take a React, Next.js, FastAPI, and Supabase web app from 0→1 on GCP App Engine; broke down user stories, led PR reviews, and mentored interns on Git and testing. • Designed database schemas and REST APIs for LangChain LLM features: resume parsing, improvement suggestions, and AI job matching.	
ZenAI — MiraclePlus (Formerly YC China) 2023 Fall Batch <i>Full Stack Developer</i>	September – December 2023 <i>Beijing, China</i>
• Built a VC-backed startup’s LLM mock-interview web app from 0→1 as the sole engineer in React, Next.js, Supabase, and PostgreSQL; owned authentication, session state, and database interactions. • Iterated AI scoring and UI from user-testing sessions and fast client feedback; demoed the product and won contracts with mid-sized companies.	

SKILLS

Languages	Python, TypeScript, JavaScript, SQL, HTML, CSS, Swift, Go, Java, C
Frameworks & Tools	React, Next.js, Tailwind CSS, FastAPI, Pydantic, Express, SwiftUI, Firebase, Supabase
Data & AI	PostgreSQL, MySQL, MongoDB, LangChain, RAG, Langfuse, PyTorch
Cloud & DevOps	GCP, AWS, Kubernetes (EKS), Docker, Helm, Jenkins, GitHub Actions, CI/CD
Testing & Practices	pytest, Unit Testing, TDD, REST APIs, Git, Agile/Scrum, Jira
Certifications	AWS Certified Solutions Architect – Associate, AWS Certified Cloud Practitioner

PROJECTS & LEADERSHIP

- **my-av:** Built a PyTorch CNN-GRU that predicts steering and speed from 20-frame (1s) video; built a data pipeline over 33 hours of Comma2k19 and ran streaming inference on local CUDA and GCP Vertex AI.
- **ECE Leadership & Engagement Fellow** (CMU, Aug 2026 – present): Own budgeting, marketing, and outreach for ECE student programs — company-sponsored hackathons, alumni events, and tech event outings.
