

EDUCATION

Carnegie Mellon University

Expected May 2027

M.S. in Software Engineering | GPA: 4.0 / 4.0

Selected Coursework: Distributed Systems, Foundations of Software Engineering, Large Language Model Systems

University of Wisconsin–Madison

May 2024

B.S. in Computer Science & B.S. in Computer Engineering | GPA: 3.72 / 4.0

Selected Coursework: Algorithms, Operating Systems, Software Engineering, Large Language Models in Practice

WORK EXPERIENCE

NewsBreak

May – August 2026

Software Engineering Intern

Mountain View, CA

- Built SportsBreak’s production Python FastAPI / MongoDB REST backend from its first commit to 89 endpoints, with ~1,450 offline tests behind a ruff / pyright / pytest CI gate; authored 344 PRs (340 merged).
- Shipped a Stripe web-checkout path for DramaBreak with a signature-verified webhook as the only trusted fulfillment path and idempotent fulfillment with stale-pending recovery; moved nine third-party integrations server-side so the iOS app ships zero third-party API credentials.
- Replaced a 25–30 request client fan-out with one backend call and a shared catalog cache 78× smaller than the per-user key, sized for a 512 MiB pod; stood up production AWS EKS (Helm, Jenkins, Docker) on day 3.
- Root-caused a 5-day silent Kubernetes CronJob outage (non-terminal ImagePullBackOff plus Forbid concurrency) and fixed it with paired job and scheduler deadlines; traced a 65% failure rate in another team’s LLM pipeline via Langfuse to an unbounded reasoning loop.
- Designed and shipped a personalized LLM news-alert pipeline (ingest → embed → LLM-score → dedupe → push); calibrated it on 4,100+ production shadow decisions and used prompt ablations and a categorical gate to cut filler alerts 34% → 4%.
- Shipped LLM agentic search with hybrid retrieval, SSE streaming, and server-resolved citations; deterministic entity resolution took real logged queries that returned nothing from 0% to 100% P@1.

Haddee Education

June – September 2025

Engineering Lead

San Diego, CA

- Led an 8-intern team through Agile sprints to take a React, Next.js, FastAPI, and Supabase web app from 0→1 on GCP App Engine; broke down user stories, led PR reviews, and mentored interns on Git and testing.
- Designed database schemas and REST APIs for LangChain LLM features: resume parsing, improvement suggestions, and AI job matching.

ZenAI — MiraclePlus (Formerly YC China) 2023 Fall Batch

September – December 2023

Full Stack Developer

Beijing, China

- Built a VC-backed startup’s LLM mock-interview web app from 0→1 as the sole engineer in React, Next.js, Supabase, and PostgreSQL; owned authentication, session state, and database interactions.
- Worked with recruiters so scoring categories matched real hiring, and iterated AI scoring and UI from user-testing sessions and fast client feedback; demoed the product and won contracts with mid-sized companies.

SKILLS

Languages	Python, Java, JavaScript, TypeScript, Go, SQL, Swift, C, HTML, CSS
Frameworks & Tools	React, Next.js, FastAPI, Pydantic, Express, Tailwind CSS, SwiftUI, Firebase, Supabase
Data & AI	MySQL, PostgreSQL, MongoDB, LangChain, RAG, Langfuse, PyTorch
Cloud & DevOps	AWS, GCP, Kubernetes (EKS), Docker, Helm, Jenkins, GitHub Actions, CI/CD, Linux
Testing & Practices	Unit Testing, pytest, TDD, REST APIs, Git, Agile/Scrum, Jira
Certifications	AWS Certified Solutions Architect – Associate, AWS Certified Cloud Practitioner

PROJECTS & LEADERSHIP

- **my-av:** Built a PyTorch CNN-GRU that predicts steering and speed from 20-frame (1s) video; built a data pipeline over 33 hours of Comma2k19 and ran streaming inference on local CUDA and GCP Vertex AI.
- **ECE Leadership & Engagement Fellow** (CMU, Aug 2026 – present): Own budgeting, marketing, and outreach for ECE student programs — company-sponsored hackathons, alumni events, and tech event outings.
