WORK EXPERIENCE

NewsBreak <i>Backend Engineer Intern</i>	May – August 2026 <i>Mountain View, CA</i>
- Built SportsBreak’s Python/FastAPI and MongoDB backend from the first commit to 89 endpoints on EKS as primary author, backed by ~1,450 fully offline tests behind a ruff / pyright / pytest CI gate. - Shipped agentic search: deterministic RAG on the first turn, a bounded tool-calling agent on follow-ups, hybrid retrieval that degrades to surviving legs, and server-resolved citations the model cannot author. - Took real logged queries that previously returned nothing from 0% to 100% P@1 with a deterministic entity resolver as the query rewriter (0.4ms), measured by an eval harness run against the real catalog. - Shipped an LLM news-alert pipeline (embed, LLM-score, categorical gate, LLM dedupe) as a Kubernetes CronJob with a per-item decision log; calibrated on 4,100+ shadow decisions, cutting filler 34% → 4%. - Diagnosed a 65% failure rate in another team’s LLM pipeline, via Langfuse traces, as an unbounded reasoning loop hitting a 16,384-token ceiling; sized a 2,048-token cap against observed p95 of 1,197.	
Haddee Education <i>Engineering Lead</i>	June – September 2025 <i>San Diego, CA</i>
- Led an 8-intern team through Agile sprints to take a React, Next.js, FastAPI, and Supabase web app from 0→1 and ship it on GCP App Engine; led PR reviews and mentored interns on testing and Git workflows. - Designed database schemas and REST APIs for LangChain LLM features, including resume parsing, improvement suggestions, and AI job matching.	
ZenAI — MiraclePlus (Formerly YC China) 2023 Fall Batch <i>Full Stack Developer</i>	September – December 2023 <i>Beijing, China</i>
- Built a VC-backed startup’s LLM mock-interview web app from 0→1 as the sole engineer (React, Next.js, Supabase, PostgreSQL); owned authentication, session state, and database interactions. - Refined AI scoring with recruiters to match real hiring criteria and iterated quickly with clients; demoed the product and obtained contracts with mid-sized companies.	

RESEARCH EXPERIENCE

Control & Learning Group — Carnegie Mellon University <i>Graduate Researcher</i> Advisor: Prof. Yorie Nakahira	February – June 2026
Mapped natural-language instructions to formal safety specs with multi-turn LLMs; built an adaptive probabilistic safety certificate with PhD researchers that outperformed Adaptive MPC in simulation.
