

EDUCATION

Carnegie Mellon University <i>M.S. in Software Engineering GPA: 4.0 / 4.0</i> Selected Coursework: Large Language Model Systems, Machine Learning, Data Science for Software Engineering	Expected May 2027
University of Wisconsin–Madison <i>B.S. in Computer Science & B.S. in Computer Engineering GPA: 3.72 / 4.0</i> Selected Coursework: Large Language Models in Practice, Software Engineering, Algorithms	May 2024

WORK EXPERIENCE

NewsBreak <i>AI Engineer Intern</i>	May – August 2026 <i>Mountain View, CA</i>
- Shipped a personalized LLM news-alert pipeline (embeddings, LLM scoring, same-story dedupe); hand-graded alerts, ran prompt ablations, and added a categorical event gate, cutting filler alerts from 34% to 4%. - Shipped a streaming agentic search API: RAG answers on turn one, then a bounded tool-calling agent (5 whitelisted tools, ≤ 3 hops) for follow-ups; the model cites sources by index only, so it cannot author a URL. - Built the SportsBreak FastAPI / MongoDB backend from scratch with AI coding assistance: 89 endpoints on EKS, $\sim 1,450$ offline tests, and a lint, type-check, and test CI gate; moved nine third-party API integrations server-side so the iOS app ships zero API credentials. - Wrote 34 contract-first API specs and $\sim 10,000$ lines of engineering docs; reopened two closed security tickets after checking the code and finding the fixes absent, and onboarded the team’s second engineer.	
Haddee Education <i>Engineering Lead</i>	June – September 2025 <i>San Diego, CA</i>
- Designed schemas and REST APIs for LangChain resume parsing, suggestions, and AI job matching. - Led an 8-intern team through Agile sprints to ship a Next.js, FastAPI, and Supabase web app on GCP App Engine; broke down user stories, led PR reviews, and mentored interns on testing and Git workflows.	
ZenAI — MiraclePlus (Formerly YC China) 2023 Fall Batch <i>Full Stack Developer</i>	September – December 2023 <i>Beijing, China</i>
- Built an LLM mock-interview web app from scratch as the sole engineer, using React, Next.js, and Supabase; owned authentication, session state, and database interactions. - Refined AI scoring with recruiters to reflect real hiring criteria and iterated the UI from user testing; demoed the product and obtained contracts with mid-sized companies.	

RESEARCH EXPERIENCE

Control & Learning Group — Carnegie Mellon University <i>Graduate Researcher Advisor: Prof. Yorie Nakahira</i>	February – June 2026
- Mapped natural-language instructions to formal safety specs with multi-turn LLMs and implemented Bayesian estimators for real-time road-friction adaptation (LuGre tire models). - Developed an Online Adaptive Probabilistic Safety Certificate (PSC) with PhD researchers; outperformed Adaptive MPC in 3-DOF vehicle simulations under environmental uncertainty.	

SKILLS

Languages	Python, TypeScript, JavaScript, Java, SQL, Go
AI & Frameworks	LangChain, RAG, hybrid retrieval, Langfuse, FastAPI, Pydantic, React, Next.js, PyTorch
Data	MongoDB, PostgreSQL, MySQL, Supabase, NumPy
Cloud & DevOps	AWS, GCP, Kubernetes (EKS), Docker, GitHub Actions, CI/CD
Testing & Practices	pytest, Unit Testing, TDD, REST APIs, Git, Agile/Scrum, Jira
Certifications	AWS Certified Solutions Architect – Associate, AWS Certified Cloud Practitioner

PROJECTS & LEADERSHIP

- my-av:** Built a PyTorch CNN-GRU that predicts steering angle and speed from 20-frame (1s) video; processed 33 hours of Comma2k19 footage and ran streaming inference on local CUDA and GCP Vertex AI.
- ECE Leadership & Engagement Fellow** (CMU, Aug 2026 – present): Own budgeting, marketing, and outreach for ECE student programs — company-sponsored hackathons, alumni events, and tech event outings.
