

# Lordphone Wen

Mountain View, CA

[lordphonewen@gmail.com](mailto:lordphonewen@gmail.com) · (608) 217-8920 · [linkedin.com/in/lordphone-wen](https://www.linkedin.com/in/lordphone-wen) · [github.com/lordphone](https://github.com/lordphone)

## EDUCATION

### Carnegie Mellon University

Expected May 2027

*M.S. in Software Engineering | GPA: 4.0 / 4.0*

Selected Coursework: Distributed Systems, Foundations of Software Engineering, Software Refactoring

### University of Wisconsin–Madison

May 2024

*B.S. in Computer Science & B.S. in Computer Engineering | GPA: 3.72 / 4.0*

Selected Coursework: Operating Systems, Computer Architecture, Algorithms, Software Engineering

## WORK EXPERIENCE

### NewsBreak

May – August 2026

*Full-Stack Engineer Intern*

*Mountain View, CA*

- Opened the SportsBreak backend with its first commit and grew it to 89 FastAPI and MongoDB endpoints on EKS, backed by ~1,450 fully offline tests and a ruff / pyright / pytest CI gate.
- Sole SwiftUI engineer for SportsBreak (~6,000 installs, 1,119 peak DAU); built server-driven UI over 27 widget types so new surfaces ship without an App Store release.
- Cut a 25–30 request client fan-out to one backend call; after pod memory neared 512MiB, found an AI-agent-written cache keyed per user and re-keyed it to a shared 10.9MB cache, 78× smaller.
- Fixed a 5-day silent Live Activity CronJob outage (ImagePullBackOff + Forbid concurrency) with paired job and scheduler deadlines; found iOS drops push-to-start without `aps.alert` while APNs returns 200.
- Introduced the team's Jira backlog, wrote 34 contract-first API specs and ~10,000 lines of engineering docs, onboarded the second engineer, and reopened two closed security tickets with evidence the fixes were absent.

### Haddee Education

June – September 2025

*Engineering Lead*

*San Diego, CA*

- Led an 8-intern team to take a React, Next.js, FastAPI, and Supabase web app from 0→1 on GCP App Engine; broke down user stories, led PR reviews, and mentored interns on testing and Git workflows.
- Designed schemas and REST APIs for LangChain resume parsing, improvement suggestions, and job matching.

### ZenAI — MiraclePlus (Formerly YC China) 2023 Fall Batch

September – December 2023

*Full Stack Developer*

*Beijing, China*

- Built an LLM mock-interview web app from scratch as the sole engineer, using React, Next.js, Supabase, and PostgreSQL; owned authentication, session state, and database interactions.
- Iterated AI scoring and UI with recruiters and users; demoed it and won contracts with mid-sized companies.

## RESEARCH EXPERIENCE

### Control & Learning Group — Carnegie Mellon University

February – June 2026

*Graduate Researcher | Advisor: Prof. Yorie Nakahira*

- Developed an Online Adaptive Probabilistic Safety Certificate (PSC) with PhD researchers; outperformed Adaptive MPC in 3-DOF vehicle simulations under environmental uncertainty, including ice.
- Mapped natural-language instructions to formal safety specs with multi-turn LLMs and implemented Bayesian estimators for real-time road-friction adaptation (LuGre tire models).

## SKILLS

### Languages

TypeScript, JavaScript, Python, SQL, Swift, Go, Java, C, HTML, CSS

### Frameworks & Tools

React, Next.js, Tailwind CSS, FastAPI, Pydantic, SwiftUI, Express, Supabase, Firebase

### Data & ML

PostgreSQL, MongoDB, MySQL, PyTorch, CUDA, NumPy, LangChain, Langfuse

### Cloud & DevOps

AWS, GCP, Linux, Kubernetes (EKS), Docker, Helm, Jenkins, GitHub Actions, CI/CD

### Testing & Practices

pytest, Unit Testing, TDD, REST APIs, Agile/Scrum, Git, Jira

### Certifications

AWS Certified Solutions Architect – Associate, AWS Certified Cloud Practitioner

## PROJECTS

- **my-av:** Built a PyTorch CNN-GRU that predicts steering and speed from 20-frame (1s) video; processed 33 hours of Comma2k19 and ran streaming inference on local CUDA and GCP Vertex AI.
- **Wisconsin Autonomous:** Integrated rover wheel-speed encoders and streamed real-time data to the onboard NVIDIA Jetson.
