EDUCATION

Carnegie Mellon University

Expected May 2027

M.S. in Software Engineering | GPA: 4.0 / 4.0

Selected Coursework: Distributed Systems, Software Refactoring, Foundations of Software Engineering

University of Wisconsin–Madison

May 2024

B.S. in Computer Science & B.S. in Computer Engineering | GPA: 3.72 / 4.0

Selected Coursework: Algorithms, Data Structure & Programming III, Software Engineering

WORK EXPERIENCE

NewsBreak

May – August 2026

Full-Stack Engineer Intern

Mountain View, CA

- Built the SportsBreak backend from scratch with Python, FastAPI, and MongoDB: 89 endpoints deployed on EKS, backed by ~1,450 offline tests and automated linting, type checking, and test gates.
- Sole SwiftUI engineer for SportsBreak, which reached ~6,000 installs and 1,119 peak daily active users; moved nine third-party integrations server-side to keep API credentials out of the iOS binary.
- Cut catalog loading from 25–30 client requests to one backend call; replaced per-user caching with a shared 10.9MB cache, reducing the cache footprint by 78× to fit a 512 MiB pod.
- Introduced the team's Jira backlog, wrote 34 contract-first API specs and ~10,000 lines of engineering documentation, and onboarded the second engineer.
- Shipped a Stripe web-checkout path with signature-verified webhooks and idempotent fulfillment; built a live manual segment-broadcast tool used for World Cup notifications.

Haddee Education

June – September 2025

Engineering Lead

San Diego, CA

- Led an 8-intern team to build and launch a React, Next.js, FastAPI, and Supabase web app on GCP App Engine; broke down user stories, led PR reviews, and mentored interns on testing and Git workflows.
- Designed schemas and REST APIs for LangChain resume parsing, improvement suggestions, and job matching.

ZenAI — MiraclePlus (Formerly YC China) 2023 Fall Batch

September – December 2023

Full Stack Developer

Beijing, China

- Built an LLM mock-interview web app from scratch as the sole engineer, using React, Next.js, Supabase, and PostgreSQL; owned authentication, session state, and database interactions.
- Refined AI scoring with recruiters to reflect real hiring criteria and improved the UI through user testing.

RESEARCH EXPERIENCE

Control & Learning Group — Carnegie Mellon University

February – June 2026

Graduate Researcher | Advisor: Prof. Yorie Nakahira

- Developed an Online Adaptive Probabilistic Safety Certificate (PSC) with PhD researchers; outperformed Adaptive MPC in 3-DOF vehicle simulations under environmental uncertainty.
- Mapped natural-language instructions to formal safety specs with multi-turn LLMs and implemented Bayesian estimators for real-time road-friction adaptation (LuGre tire models).

SKILLS

Languages	Python, TypeScript, JavaScript, SQL, Java, Swift, HTML, CSS
Frameworks & Tools	React, FastAPI, Next.js, Supabase, SwiftUI, Express, Firebase, LangChain
Data & ML	PostgreSQL, MongoDB, MySQL, PyTorch, NumPy
Cloud & DevOps	AWS, GCP, Kubernetes (EKS), Docker, Helm, Terraform, GitHub Actions, CI/CD
Testing & Practices	pytest, Unit Testing, TDD, REST APIs, Agile/Scrum, Git, Jira
Certifications	AWS Certified Solutions Architect – Associate, AWS Certified Cloud Practitioner

PROJECTS & LEADERSHIP

- **ECE Leadership & Engagement Fellow** (CMU, Aug 2026 – present): Own budgeting, marketing, and outreach for ECE student programs — company-sponsored hackathons, alumni events, and tech event outings.
- **my-av**: Built a PyTorch CNN-GRU to predict steering angle and speed from 1s video; trained on 33 hours of Comma2k19 using local CUDA and GCP Vertex AI.
