

EDUCATION

Carnegie Mellon University <i>M.S. in Software Engineering</i> GPA: 4.0 / 4.0 Selected Coursework: Distributed Systems, Foundations of Software Engineering, Software Refactoring	Expected May 2027
University of Wisconsin–Madison <i>B.S. in Computer Science & B.S. in Computer Engineering</i> GPA: 3.72 / 4.0 Selected Coursework: Operating Systems, Computer Architecture, Algorithms	May 2024

WORK EXPERIENCE

NewsBreak <i>Infrastructure Engineer Intern</i>	May – August 2026 <i>Mountain View, CA</i>
• Migrated nine third-party integrations server-side so the iOS binary ships zero third-party API credentials; shipped Firebase authentication (Google, Apple, email/password) with guest sessions upgraded by account linking; kept search conversation state on the client so no PII sat at rest. • Spot-checked two closed security tickets against the code, found the fixes absent, reopened them with line-level evidence, and documented that a ticket status field is not evidence of a code change. • Stood up production EKS (Helm, Jenkins) on day 3; diagnosed a DNS → TLS → admission-policy chain that blocked iOS clients on public networks; caught a stale ArgoCD app with prune and self-heal that would have wiped Jenkins deploys. • Diagnosed a 5-day silent CronJob outage (non-terminal ImagePullBackOff and Forbid concurrency) and fixed it with paired job and scheduler deadlines; shipped Stripe checkout with a signature-verified webhook as the only trusted fulfillment.	
Haddee Education <i>Engineering Lead</i>	June – September 2025 <i>San Diego, CA</i>
• Led an 8-intern team through Agile sprints to ship a React, Next.js, FastAPI, and Supabase web app on GCP App Engine; broke down user stories, led PR reviews, and mentored interns on testing and Git workflows. • Designed database schemas and REST APIs for LangChain resume parsing, improvement suggestions, and AI job matching.	
ZenAI — MiraclePlus (Formerly YC China) 2023 Fall Batch <i>Full Stack Developer</i>	September – December 2023 <i>Beijing, China</i>
• Built an LLM mock-interview web app from scratch as the sole engineer using React, Next.js, Supabase, and PostgreSQL; owned authentication, user session state, and database interactions.	

RESEARCH EXPERIENCE

Control & Learning Group — Carnegie Mellon University <i>Graduate Researcher</i> Advisor: Prof. Yorie Nakahira	February – June 2026
• Developed an Online Adaptive Probabilistic Safety Certificate (PSC) with PhD researchers; outperformed Adaptive MPC in 3-DOF vehicle simulations under environmental uncertainty.	

SKILLS

Languages	Python, SQL, C, Go, Java, Swift, TypeScript, JavaScript
Cloud & Systems	AWS, GCP, Kubernetes (EKS), Linux, Docker, Helm, NGINX, Grafana, Terraform
Frameworks & Tools	FastAPI, Firebase, Supabase, Pydantic, React, Next.js, Jenkins, GitHub Actions
Data & Storage	MongoDB, PostgreSQL, MySQL, REST APIs
Testing & Practices	pytest, Unit Testing, TDD, CI/CD, ruff, pyright, Git, Jira
Certifications	AWS Certified Solutions Architect – Associate, AWS Certified Cloud Practitioner

PROJECTS & LEADERSHIP

- **ECE Leadership & Engagement Fellow** (CMU, Aug 2026 – present): Own budgeting, marketing, and outreach for ECE student programs — company-sponsored hackathons, alumni events, and tech event outings.
- **my-av**: Built a PyTorch CNN-GRU to predict steering angle and speed from 20-frame (1s) video; processed 33 hours of Comma2k19 with shuffling, temporal windowing, and 240×320 frames, then trained on local CUDA and GCP Vertex AI.
