WORK EXPERIENCE

NewsBreak <i>Backend Engineer Intern</i>	May – August 2026 <i>Mountain View, CA</i>
- Built SportsBreak’s Python/FastAPI and MongoDB backend from the first commit to 89 endpoints on EKS, backed by ~1,450 fully offline tests and CI gates for linting, type checking, and tests; wrote 34 contract-first API specifications. - Migrated nine third-party integrations, including DeepInfra LLM and embedding services, server-side so the iOS binary ships zero third-party API credentials. - Cut catalog loading from 25–30 client requests to one backend call; replaced per-user caching with a shared 10.9 MB cache, reducing the cache footprint by 78× to fit a 512 MiB pod. - Built and shipped a personalized LLM news-alert pipeline with article scoring and same-story deduplication as a Kubernetes CronJob; calibrated on 4,100+ production-shadow decisions, cutting filler alerts from 34% to 4% by count.	
Haddee Education <i>Engineering Lead</i>	June – September 2025 <i>San Diego, CA</i>
- Led an 8-intern team through Agile sprints to launch a React, Next.js, FastAPI, and Supabase web app on GCP App Engine; broke down user stories, led PR reviews, and mentored interns on testing and Git workflows. - Designed database schemas and REST APIs for LangChain resume parsing, improvement suggestions, and AI job matching.	
ZenAI — MiraclePlus (Formerly YC China) 2023 Fall Batch <i>Full Stack Developer</i>	September – December 2023 <i>Beijing, China</i>
- Built an LLM mock-interview web app from scratch as the sole engineer using React, Next.js, Supabase, and PostgreSQL; owned authentication, user session state, and database interactions. - Refined AI scoring with recruiters to reflect real hiring criteria and improved the UI through user testing; demoed the product and obtained contracts with mid-sized companies.
