

EDUCATION

Carnegie Mellon University <i>M.S. in Software Engineering GPA: 4.0 / 4.0</i> Selected Coursework: Software Refactoring, Foundations of Software Engineering, Distributed Systems	Expected May 2027
University of Wisconsin–Madison <i>B.S. in Computer Science & B.S. in Computer Engineering GPA: 3.72 / 4.0</i> Selected Coursework: Data Structure & Programming III, Software Engineering, Algorithms	May 2024

WORK EXPERIENCE

NewsBreak <i>Software Engineering Intern</i>	May – August 2026 <i>Mountain View, CA</i>
- Built SportsBreak’s Python/FastAPI backend from scratch: 89 MongoDB endpoints and 129 Pydantic models; grew the suite to ~1,450 offline tests with a database fake guarding a production failure, backed by automated ruff, pyright, and pytest CI gates. - Sole SwiftUI engineer for a consumer app that reached ~6,000 installs and 1,119 peak daily active users; shipped Firebase authentication and a 72-event analytics catalog with Amplitude. Moved nine third-party integrations server-side to keep API credentials out of the iOS binary. - Built and shipped a personalized LLM news-alert pipeline with article scoring and same-story deduplication; calibrated on 4,100+ production-shadow decisions, cutting filler alerts from 34% to 4% by count. - Authored 344 PRs across five repositories (340 merged); introduced the team’s Jira backlog, wrote 34 contract-first API specs, and onboarded the second engineer.	
Haddee Education <i>Engineering Lead</i>	June – September 2025 <i>San Diego, CA</i>
- Led an 8-intern team through Agile sprints to ship a Next.js, FastAPI, and Supabase app on GCP App Engine; broke down user stories, led PR reviews, and mentored interns on testing and Git workflows. - Designed schemas and REST APIs for LangChain resume parsing, improvement suggestions, and job matching.	
ZenAI — MiraclePlus (Formerly YC China) 2023 Fall Batch <i>Full Stack Developer</i>	September – December 2023 <i>Beijing, China</i>
- Built an LLM mock-interview web app from scratch as the sole engineer, using React, Next.js, and Supabase; owned authentication, session state, and PostgreSQL database interactions. - Refined AI scoring with recruiters to reflect real hiring criteria and improved the UI through user testing.	

RESEARCH EXPERIENCE

Control & Learning Group — Carnegie Mellon University <i>Graduate Researcher Advisor: Prof. Yorie Nakahira</i>	February – June 2026
- Developed an Online Adaptive Probabilistic Safety Certificate (PSC) with PhD researchers; outperformed Adaptive MPC in 3-DOF vehicle simulations under environmental uncertainty. - Mapped natural-language instructions to formal safety specs with multi-turn LLMs and implemented Bayesian estimators for real-time road-friction adaptation (LuGre tire models).	

SKILLS

Languages	Python, TypeScript, Java, SQL, JavaScript, Swift
Testing & Practices	Unit Testing, pytest, TDD, REST APIs, Agile/Scrum, Git, Jira
Frameworks & Tools	FastAPI, Pydantic, Next.js, React, Supabase, SwiftUI, LangChain
Data & Analytics	PostgreSQL, MySQL, MongoDB, Amplitude, Langfuse, RAG
Cloud & DevOps	AWS, GCP, Kubernetes (EKS), Docker, GitHub Actions, CI/CD, ruff, pyright
Certifications	AWS Certified Solutions Architect – Associate, AWS Certified Cloud Practitioner

PROJECTS & LEADERSHIP

- ECE Leadership & Engagement Fellow** (CMU, Aug 2026 – present): Own budgeting, marketing, and outreach for ECE student programs — company-sponsored hackathons, alumni events, and tech event outings.
- my-av**: Built a PyTorch CNN-GRU to predict steering angle and speed from 1s video; trained on 33 hours of Comma2k19 using local CUDA and GCP Vertex AI.
