EDUCATION

Carnegie Mellon University **Expected May 2027**
M.S. in Software Engineering | GPA: 4.0 / 4.0
Selected Coursework: Data Science for Software Engineering, Distributed Systems, Machine Learning

University of Wisconsin–Madison **May 2024**
B.S. in Computer Science & B.S. in Computer Engineering | GPA: 3.72 / 4.0
Selected Coursework: Algorithms, Data Structure & Programming III, Software Engineering

WORK EXPERIENCE

NewsBreak **May – August 2026**
Full-Stack Engineer Intern *Mountain View, CA*

- Shipped SportsBreak as primary iOS engineer and sole backend author; built the Python FastAPI / MongoDB service from its first commit to 89 REST endpoints, with ∼1,450 offline tests gating CI.
- Built server-driven UI over 27 widget types so a new feed surface ships without an App Store release, and cut the World feed from 25–30 client requests to one backend call.
- Built a 72-event Amplitude analytics catalog with a server-side allowlist, ran a menu A/B test read by click-through rate in Amplitude, and set up Prometheus metrics and Grafana dashboards for the backend.
- Built an LLM search API with hybrid retrieval fused by RRF and SSE streaming; deterministic entity resolution got 20/20 real logged queries right that used to return nothing, at 0.4 ms per resolve.
- Designed an alert pipeline that selects by percentile against each topic's rolling 7-day score distribution, with an LLM same-story check; cut filler alerts from 34% to 4% after 11 days in shadow.
- Fixed a cache that never hit because it was keyed per user (13.2 MB each) by sharing one 10.9 MB copy near the pod's 512 MiB limit; shipped Stripe checkout with a signature-verified, idempotent webhook.

Haddee Education **June – September 2025**
Engineering Lead *San Diego, CA*

- Led an 8-intern team through Agile sprints to take a React, Next.js, FastAPI, and Supabase web app from 0→1 and ship it on GCP App Engine; led PR reviews and mentored interns on Git workflows, testing protocols, and scalable code.
- Designed the database schemas and REST APIs for LangChain LLM features: resume parsing, improvement suggestions, and AI job matching.

ZenAI — MiraclePlus (Formerly YC China) F23 **September – December 2023**
Full Stack Developer *Beijing, China*

- Sole engineer on a VC-backed startup's LLM mock-interview web app, built from 0→1 in React, Next.js, Supabase, and PostgreSQL; owned auth, session state, and database interactions.
- Iterated AI scoring and UI from user-testing sessions and client demos until three 200–500-person companies signed.

Control & Learning Group — Carnegie Mellon University **February – June 2026**
Graduate Researcher

- Developed an Online Adaptive Probabilistic Safety Certificate (PSC) with PhD researchers; outperformed Adaptive MPC in 3-DOF vehicle simulations under environmental uncertainty.

SKILLS

Languages	TypeScript, JavaScript, Java, Python, Go, Swift, SQL, HTML, CSS, C
Full-Stack	React, Next.js, Tailwind CSS, Express, FastAPI, REST APIs, Supabase, SwiftUI
Data & Analytics	PostgreSQL, MongoDB, Amplitude, Grafana, Prometheus, RAG, hybrid retrieval
Cloud & Testing	AWS, GCP, Kubernetes (EKS), Docker, GitHub Actions, pytest, Unit Testing, Git
Certifications	AWS Certified Solutions Architect – Associate, AWS Certified Cloud Practitioner

PROJECTS

- **Operating Systems (UW–Madison):** Implemented a pthread-based quicksort in C and contributed xv6 system-call entry points and a clone wrapper with pointer-argument validation.
- **my-av:** Built a CNN-GRU that predicts steering and speed from 1 s video; trained on 33 hours of Comma2k19 on local CUDA and GCP Vertex AI.
