EDUCATION

Carnegie Mellon University **Expected May 2027**
M.S. in Software Engineering | GPA: 4.0 / 4.0
Selected Coursework: Distributed Systems, Software Refactoring, Machine Learning, LLM Systems

University of Wisconsin–Madison **May 2024**
B.S. in Computer Science & B.S. in Computer Engineering | GPA: 3.72 / 4.0
Selected Coursework: Algorithms, Operating Systems, Software Engineering, Computer Architecture

WORK EXPERIENCE

NewsBreak **May – August 2026**
Software Engineering Intern *Mountain View, CA*

- Built the FastAPI / async MongoDB backend from its first commit to 89 REST endpoints across 27 routers and 7 Kubernetes CronJobs on AWS EKS, with ∼1,450 fully offline tests (1:1 with production lines, 0.17 s) behind a ruff / pyright / pytest CI gate.
- Sole SwiftUI engineer and primary backend author on SportsBreak (∼6,000 installs, 1,119 peak daily active users, 1.4K App Store ratings); authored 344 PRs across five repos (340 merged).
- Replaced a 25–30 request client fan-out with one backend call; redesigned a cache that could not hit (13.2 MB keyed per user) into a shared 10.9 MB catalog cache, 78× smaller and sized for a 512 MiB pod.
- Designed a personalized ingest → embed → LLM-score → dedupe → push pipeline; calibrated on 4,100+ production-shadow decisions, it cut filler alerts 34% → 4% and held its 2/day cap over 11,745 user-days.
- Designed an agentic search API: one SSE endpoint, deterministic RAG on turn 1 and a bounded tool-calling agent after; entity resolution took real logged queries from 0% to 100% P@1.

Haddee Education **June – September 2025**
Engineering Lead *San Diego, CA*

- Led an 8-intern team through Agile sprints to ship a React, Next.js, FastAPI, and Supabase web app from 0→1 on GCP App Engine; designed the schemas and REST APIs and led PR reviews.

ZenAI — MiraclePlus (Formerly YC China) F23 **September – December 2023**
Full Stack Developer *Beijing, China*

- Built a VC-backed startup's LLM mock-interview web app from 0→1 as the sole engineer in React, Next.js, Supabase, and PostgreSQL; owned auth, session state, and database interactions.
- Demoed the product and iterated with clients until three 200–500-person companies signed contracts.

RESEARCH EXPERIENCE

Control & Learning Group — Carnegie Mellon University **February – June 2026**
Graduate Researcher | Advisor: Prof. Yorie Nakahira

- Developed an Online Adaptive Probabilistic Safety Certificate (PSC) with PhD researchers; outperformed Adaptive MPC in 3-DOF vehicle simulations under environmental uncertainty.
- Mapped natural-language instructions to formal safety specs with multi-turn LLMs and implemented Bayesian estimators for real-time road-friction adaptation (LuGre tire models).

SKILLS

Languages	Python, TypeScript, JavaScript, Java, Go, Swift, SQL, C, Bash
Frameworks	FastAPI, Pydantic, React, Next.js, SwiftUI, Express, LangChain, Firebase, Supabase
Data & AI	MongoDB, PostgreSQL, MySQL, Redis Streams, PyTorch, RAG, LLM agents, Langfuse
Cloud & DevOps	AWS, GCP, Kubernetes (EKS), Docker, Helm, Jenkins, GitHub Actions, Prometheus
Practices	REST APIs, pytest, Unit Testing, CI/CD, Agile/Scrum, Git, Jira
Certifications	AWS Certified Solutions Architect – Associate, AWS Certified Cloud Practitioner

PROJECTS & LEADERSHIP

- **my-av:** Built a PyTorch CNN-GRU that predicts steering angle and speed from 20-frame (1s) video; processed 33 hours of Comma2k19 and trained on local CUDA and GCP Vertex AI.
- **ECE Leadership & Engagement Fellow** (CMU, Aug 2026 – present): Own budgeting, marketing, and outreach for ECE student programs — company-sponsored hackathons, alumni events, and tech event outings.
