EDUCATION

Carnegie Mellon University **Expected May 2027**
M.S. in Software Engineering | GPA: 4.0 / 4.0
Selected Coursework: Distributed Systems, Machine Learning, Large Language Model Systems

University of Wisconsin–Madison **May 2024**
B.S. in Computer Science & B.S. in Computer Engineering | GPA: 3.72 / 4.0
Selected Coursework: Algorithms, Operating Systems, Mobile Computing Laboratory

WORK EXPERIENCE

NewsBreak **May – August 2026**
Software Engineering Intern *Mountain View, CA*

- Built the FastAPI / MongoDB backend from its first commit to 89 endpoints on AWS EKS (Helm, Jenkins), with ∼1,450 offline tests behind a ruff / pyright / pytest gate; migrated nine integrations server-side so the iOS binary ships zero third-party API credentials.
- Replaced a 25–30 request client fan-out with one backend call and a shared 10.9 MB cache (78× smaller); diagnosed a five-day Live Activity CronJob outage and fixed it with paired job and scheduler deadlines.
- Sole SwiftUI engineer for SportsBreak (∼6,000 installs; peak DAU 1,119); shipped Firebase auth, server-driven UI over 27 widget types, and ActivityKit Live Activities with a shared scoreboard widget.
- Shipped agentic search with hybrid retrieval, a bounded tool-calling loop, SSE streaming, and server-resolved citations; deterministic entity resolution achieved 100% P@1 on real logged queries.

Haddee Education **June – September 2025**
Engineering Lead *San Diego, CA*

- Led an 8-intern team through Agile sprints to ship a React, Next.js, FastAPI, and Supabase web app from 0→1 on GCP App Engine; designed schemas and REST APIs for LangChain resume parsing and AI job matching.
- Broke down user stories, led PR reviews, and mentored interns on Git workflows, testing protocols, and scalable code practices.

ZenAI — MiraclePlus (Formerly YC China) 2023 Fall Batch **September – December 2023**
Full Stack Developer *Beijing, China*

- Sole engineer on a VC-backed startup's LLM mock-interview web app, built from 0→1 in React, Next.js, and Supabase; owned authentication, user session state, and PostgreSQL database interactions.
- Iterated AI scoring and UI from user-testing sessions, worked with recruiters on scoring categories, and demoed the product with fast client iterations until three 200–500-person companies signed contracts.

RESEARCH EXPERIENCE

Control & Learning Group — Carnegie Mellon University **February – June 2026**
Graduate Researcher | Advisor: Prof. Yorie Nakahira

- Developed an adaptive probabilistic safety certificate with PhD researchers; outperformed Adaptive MPC in 3-DOF vehicle simulations under environmental uncertainty, including icy conditions.
- Mapped natural-language instructions to formal safety specs with multi-turn LLMs and implemented Bayesian estimators for real-time road-friction adaptation (LuGre tire models).

SKILLS

Languages	Python, Go, Java, C, TypeScript, JavaScript, Swift, SQL
Backend & Data	FastAPI, REST APIs, MongoDB, PostgreSQL, Supabase, React, Next.js
Cloud & Quality	AWS, Kubernetes (EKS), Docker, Helm, Jenkins, GitHub Actions, pytest, CI/CD
ML & Mobile	PyTorch, CUDA, RAG, LLM tool calling / agents, SwiftUI, ActivityKit, Firebase
Certifications	AWS Certified Solutions Architect – Associate, AWS Certified Cloud Practitioner

PROJECTS

- **my-av:** Built a PyTorch CNN-GRU that predicts steering and speed from 1 s video, with a data pipeline over 33 hours of Comma2k19; trained on local CUDA and GCP Vertex AI and ran streaming inference.
- **ECE Leadership & Engagement Fellow** (CMU, Aug 2026 – present): Own budgeting, marketing, and outreach for student programs, including company-sponsored hackathons, alumni events, and tech outings.
