EDUCATION

Carnegie Mellon University **Expected May 2027**
M.S. in Software Engineering | GPA: 4.0 / 4.0
Selected Coursework: Foundations of Software Engineering, Large Language Model Systems, Machine Learning

University of Wisconsin–Madison **May 2024**
B.S. in Computer Science & B.S. in Computer Engineering | GPA: 3.72 / 4.0
Selected Coursework: Software Engineering, Algorithms, Large Language Models in Practice

WORK EXPERIENCE

NewsBreak **May – August 2026**
Software Engineering Intern *Mountain View, CA*

- Primary backend author for SportsBreak (1.4K App Store ratings, peak DAU 1,119): opened the service with its first commit, wrote 83% of its commits, and authored 344 PRs across five repos (340 merged).
- Built the FastAPI / MongoDB REST backend to 89 endpoints and ∼1,450 fully-offline unit tests behind a pytest CI gate; stood up production AWS EKS (Docker, Helm, Jenkins) on day 3.
- Shipped a personalized LLM news-alert pipeline (∼1,200 LLM calls/day); evaluated prompt ablations in production shadow on 4,100+ logged decisions and cut filler alerts 34% → 4%.
- Shipped an LLM search agent: RAG on turn 1, a bounded tool-calling loop (≤3 hops, 5 tools) for follow-ups, and server-resolved citations; entity resolution took real logged queries 0% → 100% P@1.
- Debugged production: a 5-day silent Kubernetes CronJob outage (ImagePullBackOff + Forbid concurrency), and a 65% failure rate in another team's LLM workers, traced via Langfuse to an unbounded reasoning loop.
- Introduced the team's Jira backlog, wrote 34 contract-first API specs and ∼10,000 lines of engineering docs, and onboarded the team's second engineer.

Haddee Education **June – September 2025**
Engineering Lead *San Diego, CA*

- Led 8 interns through Agile sprints to ship a React, Next.js, FastAPI, and Supabase MVP on GCP.
- Designed database schemas and REST APIs for LangChain LLM features: resume parsing, improvement suggestions, and AI job matching.
- Broke down user stories, led PR reviews, and mentored interns on Git workflows, testing, and scalable code.

ZenAI — MiraclePlus (Formerly YC China) F23 **September – December 2023**
Full Stack Developer *Beijing, China*

- Built the LLM mock-interview app from 0→1 as sole engineer in React, Next.js, and Supabase; owned auth, session state, and database interactions.
- Demoed the product and iterated with clients until three 200–500-person companies signed contracts.

RESEARCH EXPERIENCE

Control & Learning Group — Carnegie Mellon University **February – June 2026**
Graduate Researcher | Advisor: Prof. Yorie Nakahira

- Mapped natural-language instructions to formal safety specs with multi-turn LLMs and implemented Bayesian estimators for real-time road-friction adaptation (LuGre tire models).

SKILLS

Languages & AI	Python, Java, JavaScript, TypeScript, SQL, LLM tool calling / agents, RAG, Claude Code / AI coding tools
Web & Data	REST APIs, FastAPI, React, Next.js, PostgreSQL, MongoDB, Supabase, Git, Agile/Scrum
Testing & Cloud	pytest, CI/CD, GitHub Actions, Jenkins, Docker, Kubernetes (EKS), AWS, GCP, Grafana
Certifications	AWS Certified Solutions Architect – Associate, AWS Certified Cloud Practitioner

PROJECTS & LEADERSHIP

- **my-av:** Built a CNN-GRU model that predicts steering angle and speed from 20-frame (1 s) video; processed 33 hours of Comma2k19 footage and ran streaming inference on local CUDA and GCP Vertex AI.
- **ECE Leadership & Engagement Fellow** (CMU, Aug 2026 – present): Own budgeting, marketing, and outreach for ECE student programs — company-sponsored hackathons, alumni events, and tech event outings.
