EDUCATION

Carnegie Mellon University **Expected May 2027**
M.S. in Software Engineering | GPA: 4.0 / 4.0
Selected Coursework: Distributed Systems, Large Language Model Systems, Foundations of Software Engineering

University of Wisconsin–Madison **May 2024**
B.S. in Computer Science & B.S. in Computer Engineering | GPA: 3.72 / 4.0
Selected Coursework: Software Engineering, Algorithms, Large Language Models in Practice

WORK EXPERIENCE

NewsBreak **May – August 2026**
Software Engineering Intern *Mountain View, CA*

- Sole SwiftUI engineer and primary backend author for SportsBreak (1.4K App Store ratings, peak DAU 1,119); shipped Firebase auth and authored 344 PRs across five repos (340 merged).
- Built the FastAPI / MongoDB backend from its first commit to 89 endpoints and ∼1,450 offline tests; stood up production AWS EKS (Docker, Helm, Jenkins) on day 3 with Prometheus / Grafana.
- Moved nine third-party API integrations (sports data, YouTube, LLM, push) behind the backend so the iOS app ships zero third-party credentials; shipped a Stripe checkout with signature-verified, idempotent webhooks.
- Shipped an LLM search agent: RAG on turn 1, a bounded tool-calling loop (≤3 hops, 5 tools) for follow-ups, and server-resolved citations; entity resolution took real logged queries 0% → 100% P@1.
- Debugged across systems with logs and traces: a 5-day silent Kubernetes CronJob outage (ImagePullBackOff + Forbid concurrency), and a 65% failure rate in another team's LLM workers, traced via Langfuse.
- Wrote 34 contract-first API specs and ∼10,000 lines of engineering docs, introduced the team's Jira backlog, onboarded the second engineer, and worked with legal when the app needed guidance.

Haddee Education **June – September 2025**
Engineering Lead *San Diego, CA*

- Led an 8-intern team in Agile sprints to ship a React, Next.js, FastAPI, and Supabase MVP on GCP.
- Designed database schemas and REST APIs for LangChain resume parsing, suggestions, and AI job matching.
- Broke down user stories, led PR reviews, and mentored interns on Git workflows, testing, and scalable code.

ZenAI — MiraclePlus (Formerly YC China) F23 **September – December 2023**
Full Stack Developer *Beijing, China*

- Built the LLM mock-interview app from 0→1 as sole engineer in React, Next.js, and Supabase; owned auth, session state, and database interactions.
- Demoed the product and iterated with clients and recruiters so AI scoring matched real hiring, until three 200–500-person companies signed contracts.

RESEARCH EXPERIENCE

Control & Learning Group — Carnegie Mellon University **February – June 2026**
Graduate Researcher | Advisor: Prof. Yorie Nakahira

- Mapped natural-language instructions to formal safety specs with multi-turn LLMs and implemented Bayesian estimators for real-time road-friction adaptation (LuGre tire models).

SKILLS

Languages	TypeScript, JavaScript, Python, SQL, Swift, Java
APIs & Full-Stack	REST APIs, FastAPI, React, Next.js, Firebase Auth / Sign in with Apple, Stripe
Data & AI	PostgreSQL, MongoDB, LLM tool calling / agents, RAG, Claude Code / AI coding tools
Cloud	AWS, Kubernetes (EKS), Docker, CI/CD, GitHub Actions, Prometheus, Grafana
Certifications	AWS Certified Solutions Architect – Associate, AWS Certified Cloud Practitioner

PROJECTS

- **codingplans:** Building a site that rates LLM coding plans; bought Z.AI, MiniMax, and Kimi plans and tested KV caching, long context, and needle-in-a-haystack to expose nerfed caching or heavy quantization.
- **ECE Leadership & Engagement Fellow** (CMU, Aug 2026 – present): Own budgeting, marketing, and outreach for ECE student programs — company-sponsored hackathons, alumni events, and tech event outings.
