EDUCATION

Carnegie Mellon University **Expected May 2027**
M.S. in Software Engineering | GPA: 4.0 / 4.0
Selected Coursework: Data Science for Software Engineering, Machine Learning, Large Language Model Systems

University of Wisconsin–Madison **May 2024**
B.S. in Computer Science & B.S. in Computer Engineering | GPA: 3.72 / 4.0
Selected Coursework: Software Engineering, Algorithms, Large Language Models in Practice, Operating Systems

WORK EXPERIENCE

NewsBreak **May – August 2026**
Full-Stack Engineer Intern *Mountain View, CA*

- Built the Python FastAPI / MongoDB backend from its first commit to 89 REST endpoints across 27 routers, with ∼1,450 offline tests, 99.7% type-annotation coverage, and a ruff / pyright / pytest CI gate.
- Set up Prometheus metrics and Grafana dashboards on AWS EKS; designed a 72-event Amplitude analytics catalog with a server-side allowlist, and ran an A/B test on click-through.
- Shipped a personalized LLM alert pipeline (ingest, embed, score, select, dedupe) logging a decision row per item; analyzed 4,100+ rows and hand-graded alerts in production shadow to cut filler 34% → 4%.
- Shipped agentic search with server-resolved citations and no PII at rest; moved nine third-party integrations server-side so the app ships zero API credentials.
- Troubleshot a 65% failure rate in another team's LLM pipeline via Langfuse traces, sizing a token cap against p95 output; diagnosed a 5-day silent CronJob outage and fixed it with paired job and scheduler deadlines.
- Sole SwiftUI engineer and primary backend author for SportsBreak (∼6,000 installs, peak DAU 1,119); authored 344 GitHub PRs (340 merged), introduced the team's Jira backlog, wrote 34 contract-first API specs and ∼10,000 lines of docs, and onboarded the next engineer.

Haddee Education **June – September 2025**
Engineering Lead *San Diego, CA*

- Led an 8-intern team through Agile sprints to ship a React, Next.js, FastAPI, and Supabase web app from 0→1 on GCP App Engine; designed schemas and REST APIs for LangChain resume parsing and job matching.
- Broke down user stories, led PR reviews, and mentored interns on Git workflows and testing.

ZenAI — MiraclePlus (Formerly YC China) F23 **September – December 2023**
Full Stack Developer *Beijing, China*

- Built a VC-backed startup's LLM mock-interview web app from 0→1 as the sole engineer in React, Next.js, Supabase, and PostgreSQL; owned authentication, session state, and database interactions.
- Worked with recruiters so AI scoring matched real hiring, iterated from user-testing sessions, and demoed to clients until three 200–500-person companies signed contracts.

RESEARCH EXPERIENCE

Control & Learning Group — Carnegie Mellon University **February – June 2026**
Graduate Researcher | Advisor: Prof. Yorie Nakahira

- Used multi-turn LLMs to turn natural-language instructions into formal safety specs and Bayesian priors.

SKILLS

Languages	Python, SQL, TypeScript, JavaScript, Java, Go, Swift, HTML, CSS
Data & Analytics	PostgreSQL, MySQL, MongoDB, Grafana, Prometheus, Amplitude, NumPy, Langfuse
Full-Stack & Tools	FastAPI, Pydantic, React, Next.js, REST APIs, Git, GitHub Actions, pytest, Jira
Cloud	AWS, Kubernetes (EKS), Docker, Helm, Jenkins, CI/CD, GCP, Linux
Certifications	AWS Certified Solutions Architect – Associate, AWS Certified Cloud Practitioner

PROJECTS & LEADERSHIP

- **codingplans:** Building a site that rates LLM coding plans; bought Z.AI, MiniMax, and Kimi plans and tested KV caching, long context, and needle-in-a-haystack to expose nerfed caching and heavy quantization.
- **ECE Leadership & Engagement Fellow** (CMU, Aug 2026 – present): Own budgeting, marketing, and outreach for ECE student programs — company-sponsored hackathons, alumni events, and tech event outings.
