EDUCATION

Carnegie Mellon University **Expected May 2027**
M.S. in Software Engineering | GPA: 4.0 / 4.0
Selected Coursework: Distributed Systems, Data Science for Software Engineering, Machine Learning

University of Wisconsin–Madison **May 2024**
B.S. in Computer Science & B.S. in Computer Engineering | GPA: 3.72 / 4.0
Selected Coursework: Software Engineering, Algorithms, Operating Systems, Data Structure & Programming III

WORK EXPERIENCE

NewsBreak **May – August 2026**
Backend Engineer Intern *Mountain View, CA*

- Built the Python FastAPI / MongoDB backend from its first commit to 89 REST endpoints across 27 routers in production, with ∼1,450 offline tests and a ruff / pyright / pytest CI gate on every merge.
- Shipped a personalized alert pipeline (ingest, score, select, dedupe, notify) that logs one decision row per item with why it fired or not; calibrated it on 4,100+ rows in production shadow, cut filler 34% → 4%, and held its 2/day cap over 11,745 user-days with zero violations.
- Moved nine third-party data integrations server-side (SportsDataIO, YouTube, SerpApi, LLM, APNs) so the app ships zero API keys; shipped Stripe checkout with a signature-verified, idempotent webhook.
- Stood up production AWS EKS on day 3 (Docker, Helm, Jenkins, 7 CronJobs) with Prometheus and Grafana; diagnosed a 5-day silent CronJob outage and fixed it with paired deadlines.
- Diagnosed a 65% failure rate in another team's LLM pipeline via Langfuse traces; audited two closed security tickets against the code, found the fixes absent, and reopened them with line-level evidence.
- Primary backend author and sole SwiftUI engineer for SportsBreak (∼6,000 installs); authored 344 PRs (340 merged), worked with legal on launch guidance, wrote 34 API specs, and onboarded the next engineer.

Haddee Education **June – September 2025**
Engineering Lead *San Diego, CA*

- Led an 8-intern team through Agile sprints to ship a React, Next.js, FastAPI, and Supabase web app on GCP App Engine; designed schemas and REST APIs for LangChain resume parsing and job matching.
- Broke down user stories, led PR reviews, and mentored interns on Git workflows and testing.

ZenAI — MiraclePlus (Formerly YC China) F23 **September – December 2023**
Full Stack Developer *Beijing, China*

- Built a VC-backed startup's LLM mock-interview web app from 0→1 as the sole engineer in React, Next.js, Supabase, and PostgreSQL; owned authentication, session state, and database interactions.
- Worked with recruiters so AI scoring matched real hiring, iterated from user-testing sessions, and demoed to clients until three 200–500-person companies signed contracts.

RESEARCH EXPERIENCE

Control & Learning Group — Carnegie Mellon University **February – June 2026**
Graduate Researcher | Advisor: Prof. Yorie Nakahira

- Used multi-turn LLMs to turn natural-language instructions into formal safety specs and Bayesian priors.

SKILLS

Languages	Python, TypeScript, SQL, JavaScript, Java, Go, Swift, C
Backend & Data	FastAPI, Pydantic, REST APIs, PostgreSQL, MySQL, MongoDB, Supabase, React, Next.js
Cloud & DevOps	AWS, Docker, Kubernetes (EKS), Helm, Jenkins, GitHub Actions, CI/CD, Git, Linux
Monitoring	Prometheus, Grafana, Langfuse, Amplitude, pytest, ruff, pyright
Certifications	AWS Certified Solutions Architect – Associate, AWS Certified Cloud Practitioner

PROJECTS & LEADERSHIP

- **codingplans:** Building a site that rates LLM coding plans; bought Z.AI, MiniMax, and Kimi plans and tested KV caching, long context, and needle-in-a-haystack to expose nerfed caching and heavy quantization.
- **ECE Leadership & Engagement Fellow** (CMU, Aug 2026 – present): Own budgeting, marketing, and outreach for ECE student programs — company-sponsored hackathons, alumni events, and tech event outings.
